SUBJECT INDEX TO VOLUME 66, 1987

Explanation of symbols:

The page number on which an article begins is listed at the end of that article's title. An article may appear under more than one heading.

Author names are listed alphabetically. Numbers listed after each name are the page numbers of the article(s) on which their name appears.

Page numbers followed by (+) indicate a winner in the Edward H. Hatton Awards Competition.

Page numbers followed by (!) indicate a presentation at the Conference on Evaluation and Management of Salivary Gland Dysfunction, held May 15-16, 1986, at National Institutes of Health, Bethesda, Maryland.

Page numbers followed by (*) indicate a presentation at the 10th International Conference on Oral Biology, held June 22-24, 1986, in Amsterdam, The Netherlands.

Page numbers followed by (#) indicate a presentation at the symposium entitled "Topical Fluorides: Optimizing Safety and Efficacy", held March 23, 1985, at the 63rd General Session of the IADR in Las Vegas, Nevada.

ABSTRACTS

Abstracts, IADR/AADR meeting. 90–384
Divisional abstracts. 805-960

ACID ETCHING, DENTAL

Comparative study of the effects of dentinal bonding agents and application techniques on marginal gaps in class V cavities, A. Zidan, O., *et al.* 716
Etching patterns of Co-Cr alloys for bonded cast restorations. Ekstrand, K., *et al.* 1479
Evaluation of biangular reflection photometry for quantitative study of etched alloy surface roughness. Kelly, J.R., *et al.* 1350
Shear strength of the composite bond to etched porcelain. Stangel, I., *et al.* 1460

ACIDS

Effect of acid type on kinetics and mechanism of dental enamel demineralization. Patel, M.V., *et al.* 1425
Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029
Effects of variations in pH and hypothiocyanite concentrations on *s. mutans* glucose metabolism. Mansson-Rahemtulla, B., *et al.* 486*

ACTINOMYCES

In vitro caries-like lesion production by *streptococcus mutans* and *actinomyces viscosus* using sucrose and starch. Clarkson, B.H., *et al.* 795
Cross-reactivity study of whole genomic DNA probes for *haemophilus actinomycetemcomitans, bacteroides intermedius*, and *bacteroides gingivalis*. Strzempko, M.N., *et al.* 1543
Influence of human whole saliva on bacterial aggregation. Koop, H.M., *et al.* 613*
Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315
Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583

ADENOSINE CYCLIC MONOPHOSPHATE

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84
Role of protein phosphorylation in rat salivary gland exocytosis. Quissell, D.O., *et al.* 596*
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

ADENOSINE TRIPHOSPHATASE

Effect of cholesterol feeding on membrane fluidity, ($Na^+ + K^+$) ATPase, adenylate cyclase, [^{3}H]-ouabain-, and [^{3}H]-dihydroalprenolol-binding in rat submandibular salivary glands. Alam, S.Q., *et al.* 605*
Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702
Membrane-associated and solubilized ATPases of *streptococcus mutans* and *streptococcus sanguis*. Sutton, S.V.W., *et al.* 1095

ADENYL CYCLASE

Effect of cholesterol feeding on membrane fluidity, ($Na^+ + K^+$) ATPase, adenylate cyclase, [^{3}H]-ouabain-, and [^{3}H]-dihydroalprenolol-binding in rat submandibular salivary glands. Alam, S.Q., *et al.* 605*

ADRENERGIC BETA RECEPTOR AGONISTS

Effect of β_2-adrenoceptor agonists on saliva proteins and dental caries in asthmatic children. Ryberg, M., *et al.* 1404

AGING

Epidemiological investigation into the relative importance of age and oral hygiene status as determinants of periodontitis, An. Abdellatif, H.M., *et al.* 13
Longitudinal age-related changes in human parotid saliva composition. Chauncey, H.H., *et al.* 599*
Minor salivary gland duct-associated lymphoid tissue (DALT) in monkeys changes with age. Nair, P.N.R., *et al.* 407*
Ontogeny and senescence of salivary immunity. Smith, D.J., *et al.* 451*

ALUMINUM AND ALUMINUM SOLUTIONS

Effects of rare-earth filters on patient exposure and image contrast. Mauriello, S.M., *et al.* 1326

ALVEOLAR BONE

Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583

AMELOBLASTS

Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702

AMELOGENESIS

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778
Comparison of the effects of continuous and periodic fluoride delivery on fluoride levels in plasma, enamel, and bones of nursing rats, A. Drinkard, C.R., *et al.* 19
Etiological factors influencing the prevalence of developmental defects of dental enamel in nine-year-old New Zealand children participating in a health and development study. Suckling, G.W., *et al.* 1466
Immunochemical and biochemical studies of human enamel proteins during neonatal development. Zeichner-David, M., *et al.* 50
Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702
Proteins in the enamel fluid of immature porcine teeth. Aoba, T., *et al.* 1721
Short-term uptake and retention of fluoride in developing enamel and bone, The. Bawden, J.W., *et al.* 1587

AMINO ACIDS

Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation. Mann, G.E., *et al.* 569*

AMYLASES

Regulation of secretion of enzymes from von Ebner's gland of rat tongue. Field, R.B., *et al.* 586*

ANESTHETICS, LOCAL

Comparison of pain associated with mechanical and chemomechanical removal of caries. Anusavice, K.J., *et al.* 1680

ANETHOLE TRITHIONE

Systemic therapy of salivary gland hypofunction. Fox, P.C. 689!

ANIONS

Characterization of lactoferrin interaction with *streptococcus mutans.* Lassiter, M.O., *et al.* 480*
Lysozyme-protease-inorganic monovalent anion lysis of oral bacterial strains in buffers and stimulated whole saliva. Pollock, J.J., *et al.* 467*

ANOXIA

Impeded eruption rate of the rat maxillary incisor during exposure to different simulated altitudes. Giglio, M.J., *et al.* 1490

Mandibular growth retardation in growing rats chronically exposed to hypobaria. Bozzini, C.E., *et al.* 65

ANTIBODIES, MONOCLONAL

Identification of merkel cells in oral epithelium using antikeratin and antineuroendocrine monoclonal antibodies. Ness, K.H., *et al.* 1154

ANTIBODY FORMATION

Immunologic approaches to the therapy of autoimmune salivary gland disease. Lane, H.C., *et al.* 703!

Ontogeny and senescence of salivary immunity. Smith, D.J., *et al.* 451*

ANTIGEN-ANTIBODY REACTIONS

Antigenic heterogeneity of non-pigmented bacteroides species isolated from the human oral cavity. Kato, T., *et al.* 996

In vitro modulation of T6 expression on gingival langerhans cells by interleukin-1 inhibitors and ETAF. Walsh, L.J., *et al.* 766

Immunologic approaches to the therapy of autoimmune salivary gland disease. Lane, H.C., *et al.* 703!

Measuring the interaction of human secretory glycoproteins with oral bacteria. Eggert, F.M., *et al.* 610*

ANTIGENS

HSV-1-infected oral epithelial cells are targets for natural killer cells. Lindemann, R.A., *et al.* 770

Invited review: possible mechanisms involved in the immunoregulation of chronic inflammatory periodontal disease. Seymour, G.J. 2

ATMOSPHERIC PRESSURE

Mandibular growth retardation in growing rats chronically exposed to hypobaria. Bozzini, C.E., *et al.* 65

Ratings of fears associated with twelve dental situations. Stouthard, M.E.A., *et al.* 1175

ASTHMA

Effect of β_2-adrenoceptor agonists on saliva proteins and dental caries in asthmatic children. Ryberg, M., *et al.* 1404

AUSTRALOID RACE

Temporomandibular joint morphology in two Australian aboriginal populations. Richards, L.C. 1602

BACTERIA

Antigenic heterogeneity of non-pigmented *bacteroides* species isolated from the human oral cavity. Kato, T., *et al.* 996

Bacteriology of human gingivitis. Moore, L.V.H., *et al.* 989

Early microbial colonization of permucosal implants in edentulous patients. Nakou, M., *et al.* 1654

Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029

Growth of oral bacteria on saliva, The. De Jong, M.H., *et al.* 498*

Influence of human whole saliva on bacterial aggregation. Koop, H.M., *et al.* 613*

Measuring the interaction of human secretory glycoproteins with oral bacteria. Eggert, F.M., *et al.* 610*

Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

Relationship between dental plaque indices and bacteria in dental plaque and those in saliva. Schaeken, M.J.M., *et al.* 1499

Structural determinants of activity of chlorhexidine and alkyl bisbiguanides against the human oral flora. Baker, P.J., *et al.* 1099

BACTERIAL INFECTIONS

Colonization of the human oral cavity by a *streptococcus mutans* mutant producing increased bacteriocin. Hillman, J.D., *et al.* 1092

BACTERIOCINS

Bacteriocin-like inhibitory activity associated with beta-hemolytic strains of *streptococcus salivarius*. Tompkins, G.R., *et al.* 1321

Colonization of the human oral cavity by a *streptococcus mutans* mutant producing increased bacteriocin. Hillman, J.D., *et al.* 1092

BACTEROIDES

Antigenic heterogeneity of non-pigmented *bacteroides* species isolated from the human oral cavity. Kato, T., *et al.* 996

Cross-inhibition between black-pigmented *bacteroides* species. Van Winkelhoff, A.J., *et al.* 1663

Cross-reactivity study of whole genomic DNA probes for *haemophilus actinomycetemcomitans, bacteroides intermedius*, and *bacteroides gingivalis*. Strzempko, M.N., *et al.* 1543

Influence of human whole saliva on bacterial aggregation. Koop, H.M., *et al.* 613*

Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

BICARBONATES

Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791

BIGUANIDES

Structural determinants of activity of chlorhexidine and alkyl bisbiguanides against the human oral flora. Baker, P.J., *et al.* 1099

BONDING, DENTAL

Adhesion of resins to Ag-Pd alloys by means of the silicoating technique. Herø, H., *et al.* 1380

Comparative study of the effects of dentinal bonding agents and application techniques on marginal gaps in class V cavities, A. Zidan, O., *et al.* 716

Effect of acidic pretreatment on adhesion to dentin mediated by gluma. Asmussen, E., *et al.* 1386

Etching patterns of Co-Cr alloys for bonded cast restorations. Ekstrand, K., *et al.* 1479

Evaluation of biangular reflection photometry for quantitative study of etched alloy surface roughness. Kelly, J.R., *et al.* 1350

Mechanism for erosion of glass-ionomer cements in an acidic buffer solution. Fukazawa, M., *et al.* 1770

Setting stress in composite resin in relation to configuration of the restoration. Feilzer, A.J., *et al.* 1636

Shear strength of the composite bond to etched porcelain. Stangel, I., *et al.* 1460

Stiffness increase during the setting of dental composite resins. Braem, M., *et al.* 1713

Testing sealing properties of restorative materials against moist dentin. Terkla, L.G., *et al.* 1758

BONE AND BONES

Comparison of the effects of continuous and periodic fluoride delivery on fluoride levels in plasma, enamel, and bones of nursing rats, A. Drinkard, C.R., *et al.* 19

BONE MARROW

Lack of genotoxic effects of fluoride in the mouse bone-marrow micronucleus test. Li, Y., *et al.* 1687

Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

BONE MATRIX

Human dentin matrix induces cartilage formation *in vitro* by mesenchymal cells derived from embryonic muscle. Somerman, M.J., *et al.* 1551

BONE RESORPTION

Resorption of residual ridges (RRR) in rats. Nishimura, I., *et al.* 1753

BROMHEXINE

Systemic therapy of salivary gland hypofunction. Fox, P.C. 689!

CALCIUM

Abnormal ^{45}Ca fluxes in dispersed submandibular acini of rats treated with reserpine. Müller, R.M., *et al.* 1294

Calcium-dependent protein kinase reactions associated with parotid gland secretory granule membranes. Dowd, F., *et al.* 557*

Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702

Mobilization of intracellular calcium by methacholine and inositol 1,4,5-trisphosphate in rat parotid acinar cells. Aub, D.L., *et al.* 547*

Molecular mechanism of mucin secretion: I. The role of intragranular charge shielding. Verdugo, P., *et al.* 506*

Role of protein phosphorylation in rat salivary gland exocytosis. Quissell, D.O., *et al.* 596*

X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

CALCIUM-BINDING PROTEINS

Calbindin-D_{28K} localization in rat molars during odontogenesis. Elms, T.N., *et al.* 1431

CALCIUM HYDROXIDE

Antimicrobial action of new, proprietary lining cements. McComb, D., *et al.* 1025

Hard tissue barrier formation in pulpotomized monkey teeth capped with cyanoacrylate or calcium hydroxide for 10 and 60 minutes. Cvek, M., *et al.* 1166

CALCIUM PHOSPHATES

Enhanced enamel F uptake by monocalcium phosphate monohydrate gels. Takagi, S., *et al.* 1523

Possible physico-chemical processes in human dentin caries. Daculsi, G., *et al.* 1356

Use of saturated DCPD in remineralization of artificial caries lesions *in vitro*, The. Wefel, J.S., *et al.* 1640

CALLITHRIX

Cephalometric study of young marmosets (*callithrix jacchus*). Sampson, W.J., *et al.* 1684

CAPILLARIES

Transcapillary transport during secretion by the rabbit submandibular salivary gland. Smaje, L.H., *et al.* 564*

CARBOHYDRATES

In vitro caries-like lesion production by *streptococcus mutans* and *actinomyces viscosus* using sucrose and starch. Clarkson, B.H., *et al.* 795

Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*

CARBON

X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

CARBON MONOXIDE

Evaluation of biochemical validation measures in determination of smoking status. Stookey, G.K., *et al.* 1597

CARBOXYLIC ACIDS

Immunocytochemical localization of osteocalcin in developing rat teeth. Gorter De Vries, I., *et al.* 784

CARIOGENIC AGENTS

Modification of food cariogenicity in rats by mineral-rich concentrates from milk. Harper, D.S., *et al.* 42

Physiological factors affecting salivary flow rate, oral sugar clearance, and the sensation of dry mouth in man. Dawes, C. 648!

CARIOSTATIC AGENTS

Clinical results after 12 months from a study of the incidence and progression of dental caries in relation to consumption of chewing-gum containing xylitol in school preventive programs. Kandelman, D., *et al.* 1407

Concomitant deposition of strontium and fluoride in dental plaque, The. Pearce, E.I.F., *et al.* 1518

Demineralization of human dental roots in the presence of fluoride, The. Hoppenbrouwers, P.M.M., *et al.* 1370

Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791

Effects of cheese extract and its fractions on enamel demineralization *in vitro* and *in vivo* in humans. de A. Silva, M.F., *et al.* 1527

Effects of cheese snacks on caries in desalivated rats, The. Krobicka, A., *et al.* 1116

Effects of fluoride on the mouse sperm morphology test. Li, Y., *et al.* 1509

Enhanced caries inhibition by certain NaF-surfactant combinations in animal models. Caslavska, V., *et al.* 1159

Enhanced enamel F uptake by monocalcium phosphate monohydrate gels. Takagi, S., *et al.* 1523

Fluoride in dental products: safety considerations. Whitford, G.M. 1056#

Incorporation into human enamel of fluoride slowly released from a sealant *in vivo*. Tanaka, M., *et al.* 1591

Influence of incorporated and adsorbed fluoride on the dissolution of powdered and pelletized hydroxyapatite in fluoridated and non-fluoridated acid buffers, The. Wong, L., *et al.* 1735

Microbial aspects of preventive regimes in patients with overdentures. Keltjens, H.M.A.M., *et al.* 1579

Pharmacokinetic aspects of topical fluorides. Ekstrand, J. 1061#

Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583

Selection for *streptococcus mutans* with an altered xylitol transport capacity in chronic xylitol consumers. Trahan, L., *et al.* 982

CARTILAGE

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

Human dentin matrix induces cartilage formation *in vitro* by mesenchymal cells derived from emb.yonic muscle. Somerman, M.J., *et al.* 1551

CASEINS

Prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model, The. Reynolds, E.C. 1120

CATECHOL ESTROGENS

Immunocytochemical evidence for the coexistence of catecholestrogen and catechol-O-methyltransferase in the rat parotid gland.Inoue, K., *et al.* 1627

CATECHOL METHYLTRANSFERASE

Immunocytochemical evidence for the coexistence of catecholestrogen and catechol-O-methyltransferase in the rat parotid gland. Inoue, K., *et al.* 1627

CATS

Effect of sectioning the trigeminal sensory root on the periodontally-induced jaw-opening reflex, The. Collier, T.G., *et al.* 1533

CELL ADHESION

Bacterial endotoxin inhibits migration, attachment, and orientation of human gingival fibroblasts *in vitro* and delays collagen gel contraction. Pitaru, S., *et al.* 1449

CELL DIVISION

Culture of parotid acinar cells on a reconstituted basement membrane substratum. Oliver, C., *et al.* 594*

CELL MEMBRANE

Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation. Mann, G.E., *et al.* 569*

CELL MIGRATION

Bacterial endotoxin inhibits migration, attachment, and orientation of human gingival fibroblasts *in vitro* and delays collagen gel contraction. Pitaru, S., *et al.* 1449

CELL MOVEMENT

Effects of eugenol on polymorphonuclear cell migration and chemiluminescence. Fotos, P.G., *et al.* 774

Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000

CEPHALOMETRY

Cephalometric study of young marmosets (*callithrix jacchus*). Sampson, W.J., *et al.* 1684

Resorption of residual ridges (RRR) in rats. Nishimura, I., *et al.* 1753

CHEEK POUCH

Regional lymph node metastasis created by partial excision of carcinomas induced in hamster cheek pouch with 9,10-dimethyl-1,2-benzanthracene. Kage, T., *et al.* 1673

CHEESE

Effects of cheese extract and its fractions on enamel demineralization *in vitro* and *in vivo* in humans. de A. Silva, M.F., *et al.* 1527

Effects of cheese snacks on caries in desalivated rats, The. Krobicka, A., *et al.* 1116

Effects of water-soluble components of cheese on experimental caries in humans. de A. Silva, M.F., *et al.* 38

Modification of food cariogenicity in rats by mineral-rich concentrates from milk. Harper, D.S., *et al.* 42

CHEWING GUM

Clinical results after 12 months from a study of the incidence and progression of dental caries in relation to consumption of chewing-gum containing xylitol in school preventive programs. Kandelman, D., *et al.* 1407

CHLORHEXIDINE

Microbial aspects of preventive regimes in patients with overdentures. Keltjens, H.M.A.M., *et al.* 1579

Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

Recolonization of human tooth surfaces by *streptococcus mutans* after suppression by chlorhexidine treatment. Emilson, C.G., *et al.* 1503

Structural determinants of activity of chlorhexidine and alkyl bisbiguanides against the human oral flora. Baker, P.J., *et al.* 1099

CHLORIDES

Effects of ion transport inhibition on rat mandibular gland secretion. Young, J.A., *et al.* 531*

Is the stoichiometry of the parotid co-transporter 1 Na: 1 K: 2 Cl Hedemark Poulsen, J., *et al.* 608*

CHOLESTEROL

Effect of cholesterol feeding on membrane fluidity, ($Na^+ + K^+$) ATPase, adenylate cyclase, [^{3}H]-ouabain-, and [^{3}H]-dihydroalprenolol-binding in rat submandibular salivary glands. Alam, S.Q., *et al.* 605*

CLOSTRIDIOPEPTIDASE

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

COLLAGEN

Bacterial endotoxin inhibits migration, attachment, and orientation of human gingival fibroblasts *in vitro* and delays collagen gel contraction. Pitaru, S., *et al.* 1449

Collagen phagocytosis by fibroblasts in the periodontal ligament of the mouse molar during the initial phase of hypofunction. Beertsen, W. 1708

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

COLLEGENASE

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

Non-antibacterial chemically-modified tetracycline inhibits mammalian collagenase activity, A. Golub, L.M., *et al.* 1310

COLORANTS

Color accuracy of the kubelka-munk theory for various colorants in maxillofacial prosthetic material. The. Ma, T., *et al.* 1438

COMPOSITE RESINS

Adhesion of resins to Ag-Pd alloys by means of the silicoating technique. Herø, H., *et al.* 1380

Antimicrobial action of new, proprietary lining cements. McComb, D., *et al.* 1025

Characterization of polydimethacrylates and their composites by dynamic mechanical analysis. Wilson, T.W., *et al.* 1032

Comparative study of the effects of dentinal bonding agents and application techniques on marginal gaps in class V cavities, A. Zidan, O., *et al.* 716

Comparison of four modes of evaluating depth of cure of light-activated composites, A. DeWald, J.P., *et al.* 727

Effect of acidic pretreatment on adhesion to dentin mediated by gluma. Asmussen, E., *et al.* 1386

Effect of environmental aging on the fracture toughness of dental composites, The. Pilliar, R.M., *et al.* 722

Failure stress criteria for composite resin. De Groot, R., *et al.* 1748

Investigation into the fracture behavior of a particulate-filled bis-GMA resin, An. Davis, D.M., *et al.* 1128

Relationship between test methodology and elastic behavior of composites, The. Braem, B., *et al.* 1036

Setting stress in composite resin in relation to configuration of the restoration. Feilzer, A.J., *et al.* 1636

Shear strength of the composite bond to etched porcelain. Stangel, I., *et al.* 1460

Stiffness increase during the setting of dental composite resins. Braem, M., *et al.* 1713

Testing sealing properties of restorative materials against moist dentin. Terkla, L.G., *et al.* 1758

Thermal diffusivity of composite restorative materials. Watts, D.C., *et al.* 1576

Use of a bimaterial strip to predict expansion compatibility. Scherer, G.W. 1340

Variables affecting the fracture toughness of dental composites. Ferracane, J.L., *et al.* 1140

Wear and microhardness of glass-ionomer cements. McKinney, J.E., *et al.* 1134

CORROSION

Corrosion of ferromagnetic alloys used for magnetic retention of overdentures. Vrijhoef, M.M.A., *et al.* 1456

Dissolution of mercury from amalgam into saline solution. Okabe, T., *et al.* 33

COST BENEFIT ANALYSIS

Cost-effective analysis of periodontal disease control. Antczak-Bouckoms, A.A., *et al.* 1630

COTININE

Evaluation of biochemical validation measures in determination of smoking status. Stookey, G.K., *et al.* 1597

COXSACKIEVIRUSES

Inflammatory and obstructive disorders of salivary glands. Blitzer, A. 675!

CUSPID

Effect of rate of increase of electrical current on the sensation thresholds of teeth, The. Abdel Wahab, M.H., *et al.* 799

CYANOACRYLATES

Hard tissue barrier formation in pulpotomized monkey teeth capped with cyanoacrylate or calcium hydroxide for 10 and 60 minutes. Cvek, M., *et al.* 1166

CYSTIC FIBROSIS

Pathophysiology of cystic fibrosis with emphasis on salivary gland involvement. Davis, P.B. 667!

Salivary gland changes in disease. Tandler, B. 398*

Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

CYTOGENETICS

Lack of genotoxic effects of fluoride in the mouse bone-marrow micronucleus test. Li, Y., *et al.* 1687

CYTOKININS

In vitro modulation of T6 expression on gingival langerhans cells by interleukin-1 inhibitors and ETAF. Walsh, L.J., *et al.* 766

DECALCIFICATION

Comparison of the effects of fluoride and the ionophore nigericin on acid production by *streptococcus mutans* and the resultant *in vitro* enamel demineralization. Van Louveren, C., *et al.* 1658

Development of an intra-oral single-section remineralization model. Wefel, J.S., *et al.* 1485

Effect of acid type on kinetics and mechanism of dental enamel demineralization. Patel, M.V., *et al.* 1425

Physical model for non-steady-state dissolution of dental enamel. Patel, M.V., *et al.* 1418

Ultrastructure of human dental enamel heat-treated in the temperature range 200°C to 600°C, The. Palamara, J., *et al.* 1742

DECALCIFICATION TECHNIC

Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029

Effects of cheese extract and its fractions on enamel demineralization *in vitro* and *in vivo* in humans. de A. Silva, M.F., *et al.* 1527

Prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model, The. Reynolds, E.C. 1120

DENTAL ALLOYS

Adhesion of resins to Ag-Pd alloys by means of the silicoating technique. Herø, H., *et al.* 1380

Corrosion of ferromagnetic alloys used for mag-

netic retention of overdentures. Vrijhoef, M.M.A., *et al.* 1456
Dissolution of mercury from amalgam into saline solution. Okabe, T., *et al.* 33
Effect of time at 37°C on the creep and metallurgical characteristics of amalgam. Mahler, D.B., *et al.* 1146
Etching patterns of Co-Cr alloys for bonded cast restorations. Ekstrand, K., *et al.* 1479
Evaluation of biangular reflection photometry for quantitative study of etched alloy surface roughness. Kelly, J.R., *et al.* 1350
Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000
Surface characterization of amalgams using x-ray photoelectron spectroscopy. Hanawa, T., *et al.* 1470
X-ray diffractometric investigation of the Sn-Hg binary system within the 0-40% Hg interval, An. Söderholm, K.-J.M. 712

DENTAL AMALGAM

Correlation between amalgam restorations and mercury concentrations in urine. Olstad, M.L., *et al.* 1179
Creep of amalgam at low stress. Papadogiannis, Y., *et al.* 1569
Dissolution of mercury from amalgam into saline solution. Okabe, T., *et al.* 33
Dynamic creep of dental amalgam as a function of stress and number of applied stress cycles. McCabe, J.F., *et al.* 1346
Effect of time at 37°C on the creep and metallurgical characteristics of amalgam. Mahler, D.B., *et al.* 1146
Factors affecting estimation of dental amalgam mercury exposure from measurements of mercury vapor levels in intra-oral and expired air. Mackert, J.R., Jr. 1775
New method to measure the condensation pressure of amalgam under *in vivo* conditions, A. Lussi, A.S., *et al.* 737
Surface characterization of amalgams using x-ray photoelectron spectroscopy. Hanawa, T., *et al.* 1470
Time-dependent dissolution of amalgams into saline solution. Ferracane, J.L., *et al.* 1331
X-ray diffractometric investigation of the Sn-Hg binary system within the 0-40% Hg interval, An. Söderholm, K.-J.M. 712

DENTAL CARIES

In vitro caries-like lesion production by *streptococcus mutans* and *actinomyces viscosus* using sucrose and starch. Clarkson, B.H., *et al.* 795
30-month longitudinal study of the effects of some oral hygiene measures on *streptococcus mutans* and approximal dental caries, A. Axelsson, P., *et al.* 761
Bacteriological study of rampant caries in children, A. Boue, D., *et al.* 23
Clinical application of topical fluoride products - risks, benefits, and recommendations. Lecompte, E.J. 1066#
Clinical results after 12 months from a study of the incidence and progression of dental caries in relation to consumption of chewing-gum containing xylitol in school preventive programs. Kandelman, D., *et al.* 1407
Colonization of the human oral cavity by a *streptococcus mutans* mutant producing increased bacteriocin. Hillman, J.D., *et al.* 1092
Comparison of pain associated with mechanical and chemomechanical removal of caries. Anusavice, K.J., *et al.* 1680
Concomitant deposition of strontium and fluoride in dental plaque, The. Pearce, E.I.F., *et al.* 1518
Effect of β_2-adrenoceptor agonists on saliva proteins and dental caries in asthmatic children. Ryberg, M., *et al.* 1404
Effect of baseline lesion mineral loss on *in situ* remineralization, The. Strang, R., *et al.* 1644
Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791
Effects of cheese snacks on caries in desalivated rats, The. Krobicka, A., *et al.* 1116
Effects of fluoride on the mouse sperm morphology test. Li, Y., *et al.* 1509
Effects of pH on expression of sodium fluoride resistance in *streptococcus mutans*. Brussock, S.M., *et al.* 1594
Effects of water-soluble components of cheese on experimental caries in humans. de A. Silva, M.F., *et al.* 38
Enhanced caries inhibition by certain NaF-surfactant combinations in animal models. Caslavska, V., *et al.* 1159
Enhanced enamel F uptake by monocalcium phosphate monohydrate gels. Takagi, S., *et al.* 1523
Fluoride in dental products: safety considerations. Whitford, G.M. 1056#
Influence of incorporated and adsorbed fluoride on the dissolution of powdered and pelletized hydroxyapatite in fluoridated and non-fluoridated acid buffers, The. Wong, L., *et al.* 1735
Intracrystalline structure of enamel crystals affected by caries. Tohda, H., *et al.* 1647
Management of oral sequelae. Wright, W.E. 699!
Micro-electrode techniques for the analysis of oral fluids. Vogel, G.L., *et al.* 1691
Microbial aspects of preventive regimes in patients with overdentures. Keltjens, H.M.A.M., *et al.* 1579
Pharmacokinetic aspects of topical fluorides. Ekstrand, J. 1061#
Pharmacological evaluation of an intra-oral fluoride-releasing device in adolescents. Kula, K., *et al.* 1538
Physical model for non-steady-state dissolution of dental enamel. Patel, M.V., *et al.* 1418
Physiological factors affecting salivary flow rate, oral sugar clearance, and the sensation of dry mouth in man. Dawes, C. 648!
Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*
Possible physico-chemical processes in human dentin caries. Daculsi, G., *et al.* 1356
Prevalence of total tooth loss, dental caries, and periodontal disease in Mexican-American adults: results from the southwestern HHANES. Ismail, A.I., *et al.* 1183
Prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model, The. Reynolds, E.C. 1120
Recolonization of human tooth surfaces by *streptococcus mutans* after suppression by chlorhexidine treatment. Emilson, C.G., *et al.* 1503
Relationship between dental plaque indices and bacteria in dental plaque and those in saliva. Schaeken, M.J.M., *et al.* 1499
Relationship between root caries and coronal decay. Vehkalahti, M.M. 1608
Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583
Selection for *streptococcus mutans* with an altered xylitol transport capacity in chronic xylitol consumers. Trahan, L., *et al.* 982
Simplified diagnostic system for cultural detection and enumeration of *streptococcus mutans*, A. Jordan, H.V., *et al.* 57
Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: a discussion of risks and benefits. Ripa, L.W. 1079#
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#
Use of saturated DCPD in remineralization of artificial caries lesions *in vitro*, The. Wefel, J.S., *et al.* 1640

DENTAL CASTING TECHNIC

Adhesion of resins to Ag-Pd alloys by means of the silicoating technique. Herø, H., *et al.* 1380
Longitudinal study of anteroposterior growth changes in the palatine rugae, A. Simmons, J.D., *et al.* 1512

DENTAL CEMENTS

Antimicrobial action of new, proprietary lining cements. McComb, D., *et al.* 1025
Thermal diffusivity of glass-ionomer cements. Tay, W.M., *et al.* 1040
Wear and microhardness of glass-ionomer cements. McKinney, J.E., *et al.* 1134

DENTAL CEMENTUM

Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399

DENTAL CROWNS

Effect of incompatibility stress on the fit of metal-ceramic crowns. Anusavice, K.J., *et al.* 1341
Relationship between root caries and coronal decay. Vehkalahti, M.M. 1608
Stress distribution in metal-ceramic crowns with a facial porcelain margin. Anusavice, K.J., *et al.* 1493

DENTAL ENAMEL

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778
Clinical application of topical fluoride products - risks, benefits, and recommendations. Lecompte, E.J. 1066#
Comparison of the effects of continuous and periodic fluoride delivery on fluoride levels in plasma, enamel, and bones of nursing rats, A. Drinkard, C.R., *et al.* 19
Comparison of the effects of fluoride and the ionophore nigericin on acid production by

streptococcus mutans and the resultant *in vitro* enamel demineralization. Van Louveren, C., *et al.* 1658
Demineralization of human dental roots in the presence of fluoride, The. Hoppenbrouwers, P.M.M., *et al.* 1370
Dental papilla cells synthesize but do not deposit fibronectin in culture. Thesleff, I., *et al.* 1107
Effect of acid type on kinetics and mechanism of dental enamel demineralization. Patel, M.V., *et al.* 1425
Effect of acidic pretreatment on adhesion to dentin mediated by gluma. Asmussen, E., *et al.* 1386
Effect of baseline lesion mineral loss on *in situ* remineralization, The. Strang, R., *et al.* 1644
Effects of cheese extract and its fractions on enamel demineralization *in vitro* and *in vivo* in humans. de A. Silva, M.F., *et al.* 1527
Enhanced caries inhibition by certain NaF-surfactant combinations in animal models. Caslavska, V., *et al.* 1159
Enhanced enamel F uptake by monocalcium phosphate monohydrate gels. Takagi, S., *et al.* 1523
Etiological factors influencing the prevalence of developmental defects of dental enamel in nine-year-old New Zealand children participating in a health and development study. Suckling, G.W., *et al.* 1466
Fluoride in dental products: safety considerations. Whitford, G.M. 1056#
Incorporation into human enamel of fluoride slowly released from a sealant *in vivo*. Tanaka, M., *et al.* 1591
Influence of plaque on reaction mechanism of MFP and NaF *in vivo*, The. Hellwig, E., *et al.* 46
Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702
Intra-oral effects on acid-softened enamel of NaF lozenges administered in divided daily doses. Corpron, R.E., *et al.* 1020
Intracrystalline structure of enamel crystals affected by caries. Tohda, H., *et al.* 1647
Micro-electrode techniques for the analysis of oral fluids. Vogel, G.L., *et al.* 1691
Pharmacokinetic aspects of topical fluorides. Ekstrand, J. 1061#
Physical model for non-steady-state dissolution of dental enamel. Patel, M.V., *et al.* 1418
Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*
Prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model, The. Reynolds, E.C. 1120
Proteins in the enamel fluid of immature porcine teeth. Aoba, T., *et al.* 1721
Relationship between root caries and coronal decay. Vehkalahti, M.M. 1608
Ultrastructure of human dental enamel heat-treated in the temperature range 200° C to 600° C, The. Palamara, J., *et al.* 1742
Use of saturated DCPD in remineralization of artificial caries lesions *in vitro*, The. Wefel, J.S., *et al.* 1640
X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

DENTAL ENAMEL PROTEINS

Immunochemical and biochemical studies of human enamel proteins during neonatal development. Zeichner-David, M., *et al.* 50
Proteins in the enamel fluid of immature porcine teeth. Aoba, T., *et al.* 1721

DENTAL ENAMEL SOLUBILITY

Effect of acid type on kinetics and mechanism of dental enamel demineralization. Patel, M.V., *et al.* 1425
Physical model for non-steady-state dissolution of dental enamel. Patel, M.V., *et al.* 1418

DENTAL HEALTH SURVEYS

Clinical results after 12 months from a study of the incidence and progression of dental caries in relation to consumption of chewing-gum containing xylitol in school preventive programs. Kandelman, D., *et al.* 1407
Efficiency of half-mouth examinations in estimating the prevalence of periodontal disease, The. Hunt, R.J. 1044
Epidemiological investigation into the relative importance of age and oral hygiene status as determinants of periodontitis, An. Abdellatif, H.M., *et al.* 13
Etiological factors influencing the prevalence of developmental defects of dental enamel in nine-year-old New Zealand children participating in a health and development study. Suckling, G.W., *et al.* 1466
Impact of dental and facial pain, The. Locker, D., *et al.* 1414
Prevalence of total tooth loss, dental caries, and periodontal disease in Mexican-American adults: results from the southwestern HHANES. Ismail, A.I., *et al.* 1183

DENTAL IMPLANTATION

Early microbial colonization of permucosal implants in edentulous patients. Nakou, M., *et al.* 1654
Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000

DENTAL MATERIALS

Guest editorial: importance of international standardization in dental products. Stanford, J.W. 1780

DENTAL PAPILLA

Dental papilla cells synthesize but do not deposit fibronectin in culture. Thesleff, I., *et al.* 1107

DENTAL PLAQUE

Bacteriological study of rampant caries in children, A. Boue, D., *et al.* 23
Characteristics of trypsin-like activity in subgingival plaque samples. Bretz, W.A., *et al.* 1668
Concomitant deposition of strontium and fluoride in dental plaque, The. Pearce, E.I.F., *et al.* 1518
Early microbial colonization of permucosal implants in edentulous patients. Nakou, M., *et al.* 1654
Effect of the lactoperoxidase system on streptococcal acid production and growth. Donoghue, H.D., *et al.* 616*
Effects of cheese extract and its fractions on enamel demineralization *in vitro* and *in vivo* in humans. de A. Silva, M.F., *et al.* 1527
Effects of water-soluble components of cheese on experimental caries in humans. de A. Silva, M.F., *et al.* 38
Fluoride in saliva and plaque following use of fluoride-containing mouthwashes. Duckworth, R.M., *et al.* 1730
Influence of plaque on reaction mechanism of MFP and NaF *in vivo*, The. Hellwig, E., *et al.* 46
Influence of salivary flow rate on diffusion of potassium chloride from artificial plaque at different sites in the mouth, The. LeComte, P., *et al.* 1614
Invited review: possible mechanisms involved in the immunoregulation of chronic inflammatory periodontal disease. Seymour, G.J. 2
Micro-electrode techniques for the analysis of oral fluids. Vogel, G.L., *et al.* 1691
Phenytoin and 5-(p-hydroxyphenyl)-5-phenylhydantoin do not alter the effects of bacterial and amplified plaque extracts on cultures of fibroblasts from normal and overgrown gingivae. Smith, Q.T., *et al.* 1393
Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*
Prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model, The. Reynolds, E.C. 1120
Structural determinants of activity of chlorhexidine and alkyl bisbiguanides against the human oral flora. Baker, P.J., *et al.* 1099

DENTAL PLAQUE INDEX

Relationship between dental plaque indices and bacteria in dental plaque and those in saliva. Schaeken, M.J.M., *et al.* 1499

DENTAL PORCELAINS

Effect of incompatibility stress on the fit of metal-ceramic crowns. Anusavice, K.J., *et al.* 1341
Experimental observation of silver and gold penetration into dental ceramic by means of a radiotracer technique. Moya, F., *et al.* 1717
Stress distribution in metal-ceramic crowns with a facial porcelain margin. Anusavice, K.J., *et al.* 1493
Use of a bimaterial strip to predict expansion compatibility. Scherer, G.W. 1340

DENTAL PROSTHESIS

Resorption of residual ridges (RRR) in rats. Nishimura, I., *et al.* 1753

DENTAL PULP

Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029
Effect of rate of increase of electrical current on the sensation thresholds of teeth, The. Abdel Wahab, M.H., *et al.* 799
Hard tissue barrier formation in pulpotomized monkey teeth capped with cyanoacrylate or calcium hydroxide for 10 and 60 minutes. Cvek, M., *et al.* 1166

Immunocompetent cells in the normal dental pulp. Jontell, M., *et al.* 1149
Invited review: neurobiology of facial and dental pain: present knowledge, future directions, The. Sessle, B.J. 962
Morphometric analysis of teeth with inflamed pulp. Warfvinge, J. 78

DENTAL PULP CAVITY

In vitro infection and disinfection of dentinal tubules. Haapasalo, M., *et al.* 1375
Demineralization of human dental roots in the presence of fluoride, The. Hoppenbrouwers, P.M.M., *et al.* 1370

DENTAL STRESS ANALYSIS

Creep of amalgam at low stress. Papadogiannis, Y., *et al.* 1569
Dynamic creep of dental amalgam as a function of stress and number of applied stress cycles. McCabe, J.F., *et al.* 1346
Effect of environmental aging on the fracture toughness of dental composites, The. Pilliar, R.M., *et al.* 722
Effect of incompatibility stress on the fit of metal-ceramic crowns. Anusavice, K.J., *et al.* 1341
Failure stress criteria for composite resin. De Groot, R., *et al.* 1748
Investigation into the fracture behavior of a particulate-filled bis-GMA resin, An. Davis, D.M., *et al.* 1128
New method to measure the condensation pressure of amalgam under *in vivo* conditions, A. Lussi, A.S., *et al.* 737
Rheology of saliva, The. Schwarz, W.H. 660!
Setting stress in composite resin in relation to configuration of the restoration. Feilzer, A.J., *et al.* 1636
Stress distribution in metal-ceramic crowns with a facial porcelain margin. Anusavice, K.J., *et al.* 1493
Temperature-dependence of compressive properties of human dentin. Watts, D.C., *et al.* 29
Use of a bimaterial strip to predict expansion compatibility. Scherer, G.W. 1340

DENTIFRICES

Clinical application of topical fluoride products - risks, benefits, and recommendations. Lecompte, E.J. 1066#
Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791
Fluoride in dental products: safety considerations. Whitford, G.M. 1056#
Pharmacokinetic aspects of topical fluorides. Ekstrand, J. 1061#
Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

DENTIN

In vitro infection and disinfection of dentinal tubules. Haapasalo, M., *et al.* 1375
Comparative study of the effects of dentinal bonding agents and application techniques on marginal gaps in class V cavities, A. Zidan, O., *et al.* 716
Comparison of pain associated with mechanical and chemomechanical removal of caries. Anusavice, K.J., *et al.* 1680
Effect of acidic pretreatment on adhesion to dentin mediated by gluma. Asmussen, E., *et al.* 1386
Human dentin matrix induces cartilage formation *in vitro* by mesenchymal cells derived from embryonic muscle. Somerman, M.J., *et al.* 1551
Immunocytochemical localization of osteocalcin in developing rat teeth. Gorter De Vries, I., *et al.* 784
Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399
Possible physico-chemical processes in human dentin caries. Daculsi, G., *et al.* 1356
Temperature-dependence of compressive properties of human dentin. Watts, D.C., *et al.* 29
Testing sealing properties of restorative materials against moist dentin. Terkla, L.G., *et al.* 1758

DENTINOGENESIS

Human dentin matrix induces cartilage formation *in vitro* by mesenchymal cells derived from embryonic muscle. Somerman, M.J., *et al.* 1551

DENTIST-PATIENT RELATIONS

Invited review: neurobiology of facial and dental pain: present knowledge, future directions, The. Sessle, B.J. 962
Ratings of fears associated with twelve dental situations. Stouthard, M.E.A., *et al.* 1175

DENTITION

Bacteriological study of rampant caries in children, A. Boue, D., *et al.* 23

DENTURES

Corrosion of ferromagnetic alloys used for magnetic retention of overdentures. Vrijhoef, M.M.A., *et al.* 1456
Early microbial colonization of permucosal implants in edentulous patients. Nakou, M., *et al.* 1654
Microbial aspects of preventive regimes in patients with overdentures. Keltjens, H.M.A.M., *et al.* 1579

DEXAMETHASONE

Regulation of parotid salivary proteins by glucocorticoids. Johnson, D.A., *et al.* 1563
Regulation of salivary proteins. Johnson, D.A., *et al.* 576*

DIABETES

Parotid gland function in streptozotocin-diabetic rats. Anderson, L.C. 425*

DIAGNOSIS, ORAL

Current diagnostic uses of saliva. Ferguson, D.B., *et al.* 420*

DIAGNOSTIC TESTS

Simplified diagnostic system for cultural detection and enumeration of *streptococcus mutans*, A. Jordan, H.V., *et al.* 57

DIET

Effects of cheese snacks on caries in desalivated rats, The. Krobicka, A., *et al.* 1116
Prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model, The. Reynolds, E.C. 1120

DIHYDROALPRENOLOL

Effect of cholesterol feeding on membrane fluidity, $(Na^+ + K^+)$ ATPase, adenylate cyclase, $[^3H]$-ouabain-, and $[^3H]$-dihydroalprenolol-binding in rat submandibular salivary glands. Alam, S.Q., *et al.* 605*

9,10 - DIMETHYL - 1,2 - BENZANTHRACENE

Regional lymph node metastasis created by partial excision of carcinomas induced in hamster cheek pouch with 9,10-dimethyl-1,2-benzanthracene. Kage, T., *et al.* 1673

DMF INDEX

Prevalence of total tooth loss, dental caries, and periodontal disease in Mexican-American adults: results from the southwestern HHANES. Ismail, A.I., *et al.* 1183

DNA, BACTERIAL

Cross-reactivity study of whole genomic DNA probes for *haemophilus actinomycetemcomitans, bacteroides intermedius*, and *bacteroides gingivalis*. Strzempko, M.N., *et al.* 1543

DRINKING WATER

Effects of pH on expression of sodium fluoride resistance in *streptococcus mutans*. Brussock, S.M., *et al.* 1594
Patterns of dental fluorosis in a European country in relation to the fluoride concentration of drinking water. Larsen, M.J., *et al.* 10

DRUG THERAPY

Methotrexate-induced changes in rat parotid and submandibular gland function. McBride, R.K., *et al.* 1445

DYNAMIC MECHANICAL ANALYSIS

Characterization of polydimethacrylates and their composites by dynamic mechanical analysis. Wilson, T.W., *et al.* 1032
Relationship between test methodology and elastic behavior of composites, The. Braem, B., *et al.* 1036

EDTA

Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029

ELECTRIC STIMULATION

Effect of rate of increase of electrical current on the sensation thresholds of teeth, The. Abdel Wahab, M.H., *et al.* 799

ELECTROLYTES

Developmental changes in the volumes, protein, and some electrolyte concentrations of male

and female rat submandibular saliva secreted in response to methoxamine and pilocarpine. Abe, K., *et al.* 745
Ion transport and water movement. Martinez, J.R. 638!
Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

ELECTRON PROBE MICROANALYSIS

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778
Intracellular elemental concentrations in resting and secreting rat parotid glands. Izutsu, K.T., *et al.* 537*

ENAMEL ORGAN

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778
Diffusion of fluoride through the rat enamel organ *in vitro*. Bawden, J.W., *et al.* 1360
Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702

ENDOCYTOSIS

Endocytosis of proteins by salivary gland duct cells. Hand, A.R., *et al.* 412*

ENDOTOXINS

Bacterial endotoxin inhibits migration, attachment, and orientation of human gingival fibroblasts *in vitro* and delays collagen gel contraction. Pitaru, S., *et al.* 1449

EPIDEMIOLOGIC METHODS

Epidemiological investigation into the relative importance of age and oral hygiene status as determinants of periodontitis, An. Abdellatif, H.M., *et al.* 13
Long-term epidemiologic study of the relationship between occlusal factors and mandibular dysfunction in children and adolescents, A. Egermark-Eriksson, I., *et al.* 67

EPINEPHRINE

Effects of various secretagogues on the mucin content of pure submandibular salivas, The. Denny, P.C., *et al.* 1011

EPITHELIUM

Identification of merkel cells in oral epithelium using antikeratin and antineuroendocrine monoclonal antibodies. Ness, K.H., *et al.* 1154
Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation. Mann, G.E., *et al.* 569*

EUGENOL

Effects of eugenol on polymorphonuclear cell migration and chemiluminescence. Fotos, P.G., *et al.* 774

EXOCRINE GLANDS

Pathophysiology of cystic fibrosis with emphasis on salivary gland involvement. Davis, P.B. 667!
Protein production and secretion in exocrine cells. Castle, J.D., *et al.* 633!

EXOCYTOSIS

Calcium-dependent protein kinase reactions associated with parotid gland secretory granule membranes. Dowd, F., *et al.* 557*
Protein production and secretion in exocrine cells. Castle, J.D., *et al.* 633!
Role of protein phosphorylation in rat salivary gland exocytosis. Quissell, D.O., *et al.* 596*
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

FACIAL BONES

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

FACIAL PAIN

Impact of dental and facial pain, The. Locker, D., *et al.* 1414
Invited review: neurobiology of facial and dental pain: present knowledge, future directions, The. Sessle, B.J. 962

FEAR

Ratings of fears associated with twelve dental situations. Stouthard, M.E.A., *et al.* 1175

FIBROBLASTS

Bacterial endotoxin inhibits migration, attachment, and orientation of human gingival fibroblasts *in vitro* and delays collagen gel contraction. Pitaru, S., *et al.* 1449
Collagen phagocytosis by fibroblasts in the periodontal ligament of the mouse molar during the initial phase of hypofunction. Beertsen, W. 1708
Hyaluronidase activity of rabbit skin wound granulation tissue fibroblasts. Ruggiero, S.L., *et al.* 1283+
Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+
Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000
Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399
Movement of fibroblasts in the periodontal ligament of the mouse incisor is related to eruption. Beertsen, W., *et al.* 1006
Phenytoin and 5-(p-hydroxyphenyl)-5-phenylhydantoin do not alter the effects of bacterial and amplified plaque extracts on cultures of fibroblasts from normal and overgrown gingivae. Smith, Q.T., *et al.* 1393

FIBRONECTINS

Dental papilla cells synthesize but do not deposit fibronectin in culture. Thesleff, I., *et al.* 1107

FLUORESCENT DYES

Concerning the origin of substance P-containing nerves in rat parotid glands. Breen, M.F., *et al.* 583*

FLUORIDES

A symposium — topical fluorides: optimizing safety and efficacy — introduction. Carlos, J.P. 1055#
Clinical application of topical fluoride products - risks, benefits, and recommendations. Lecompte, E.J. 1066#
Comparison of the effects of continuous and periodic fluoride delivery on fluoride levels in plasma, enamel, and bones of nursing rats, A. Drinkard, C.R., *et al.* 19
Comparison of the effects of fluoride and the ionophore nigericin on acid production by *streptococcus mutans* and the resultant *in vitro* enamel demineralization. Van Louveren, C., *et al.* 1658
Concomitant deposition of strontium and fluoride in dental plaque, The. Pearce, E.I.F., *et al.* 1518
Demineralization of human dental roots in the presence of fluoride, The. Hoppenbrouwers, P.M.M., *et al.* 1370
Development of an intra-oral single-section remineralization model. Wefel, J.S., *et al.* 1485
Diffusion of fluoride through the rat enamel organ *in vitro*. Bawden, J.W., *et al.* 1360
Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791
Effects of fluoride on the mouse sperm morphology test. Li, Y., *et al.* 1509
Effects of pH on expression of sodium fluoride resistance in *streptococcus mutans*. Brussock, S.M., *et al.* 1594
Enhanced caries inhibition by certain NaF-surfactant combinations in animal models. Caslavska, V., *et al.* 1159
Enhanced enamel F uptake by monocalcium phosphate monohydrate gels. Takagi, S., *et al.* 1523
Fluoride in dental products: safety considerations. Whitford, G.M. 1056#
Fluoride in saliva and plaque following use of fluoride-containing mouthwashes. Duckworth, R.M., *et al.* 1730
Incorporation into human enamel of fluoride slowly released from a sealant *in vivo*. Tanaka, M., *et al.* 1591
Influence of incorporated and adsorbed fluoride on the dissolution of powdered and pelletized hydroxyapatite in fluoridated and nonfluoridated acid buffers, The. Wong, L., *et al.* 1735
Influence of plaque on reaction mechanism of MFP and NaF *in vivo*, The. Hellwig, E., *et al.* 46
Intra-oral effects on acid-softened enamel of NaF lozenges administered in divided daily doses. Corpron, R.E., *et al.* 1020
Microbial aspects of preventive regimes in pa-

tients with overdentures. Keltjens, H.M.A.M., *et al.* 1579
Patterns of dental fluorosis in a European country in relation to the fluoride concentration of drinking water. Larsen, M.J., *et al.* 10
Pharmacokinetic aspects of topical fluorides. Ekstrand, J. 1061#
Pharmacological evaluation of an intra-oral fluoride-releasing device in adolescents. Kula, K., *et al.* 1538
Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*
Short-term uptake and retention of fluoride in developing enamel and bone, The. Bawden, J.W., *et al.* 1587
Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: a discussion of risks and benefits. Ripa, L.W. 1079#
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

FLUOROSIS (*see also* Mottled Enamel)

Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: a discussion of risks and benefits. Ripa, L.W. 1079#

FOOD ANALYSIS

Measurement of selection chances and breakage functions during chewing in man. Van der glas, H.W., *et al.* 1547

FOURIER ANALYSIS

Spectral properties of temporomandibular joint sounds, The. Gay, T., *et al.* 1189
Variables affecting the fracture toughness of dental composites. Ferracane, J.L., *et al.* 1140

FUCOSYLTRANSFERASES

Purification and some properties of fucosyltransferase in human parotid saliva. Tamagawa, H., *et al.* 72
Substrate specificity of fucosyltransferase purified from human parotid saliva. Tamagawa, H., *et al.* 756

FUSOBACTERIUM

Lysozyme-protease-inorganic monovalent anion lysis of oral bacterial strains in buffers and stimulated whole saliva. Pollock, J.J., *et al.* 467*
Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

GANGLIA

Concerning the origin of substance P-containing nerves in rat parotid glands. Breen, M.F., *et al.* 583*

SPINAL

Effect of sectioning the trigeminal sensory root on the periodontally-induced jaw-opening reflex, The. Collier, T.G., *et al.* 1533

SYMPATHETIC

Altered sympathetic-salivary gland development: delayed response to postnatal castration. Melvin, J.E., *et al.* 751

GASTRIC MUCOSA

Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

GINGIVA

Bacterial endotoxin inhibits migration, attachment, and orientation of human gingival fibroblasts *in vitro* and delays collagen gel contraction. Pitaru, S., *et al.* 1449
Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+
Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000
Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399
Phenytoin and 5-(p-hydroxyphenyl)-5-phenylhydantoin do not alter the effects of bacterial and amplified plaque extracts on cultures of fibroblasts from normal and overgrown gingivae. Smith, Q.T., *et al.* 1393

GINGIVECTOMY

Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583

GINGIVITIS

Bacteriology of human gingivitis. Moore, L.V.H., *et al.* 989
Relationship between dental plaque indices and bacteria in dental plaque and those in saliva. Schaeken, M.J.M., *et al.* 1499

GLASS-IONOMER CEMENTS

Mechanism for erosion of glass-ionomer cements in an acidic buffer solution. Fukazawa, M., *et al.* 1770
Testing sealing properties of restorative materials against moist dentin. Terkla, L.G., *et al.* 1758
Thermal diffusivity of glass-ionomer cements. Tay, W.M., *et al.* 1040
Wear and microhardness of glass-ionomer cements. McKinney, J.E., *et al.* 1134

GLUCOCORTICOIDS

Regulation of parotid salivary proteins by glucocorticoids. Johnson, D.A., *et al.* 1563

GLUCONATES

Effects of ion transport inhibition on rat mandibular gland secretion. Young, J.A., *et al.* 531*

GLUTARALDEHYDE

Effect of acidic pretreatment on adhesion to dentin mediated by gluma. Asmussen, E., *et al.* 1386

GLYCOPROTEINS

Characterization of lactoferrin interaction with *streptococcus mutans*. Lassiter, M.O., *et al.* 480*
Genetic and sex-related differences in the structure of submandibular glycoconjugates. Schulte, B.A. 442*
Growth of oral bacteria on saliva, The. De Jong, M.H., *et al.* 498*
Measuring the interaction of human secretory glycoproteins with oral bacteria. Eggert, F.M., *et al.* 610*
Regulatory aspects of N-linked glycoproteins. Kousvelari, E.E., *et al.* 552*
Structural aspects of salivary glycoproteins. Levine, M.J., *et al.* 436*

GLYCOSAMINOGLYCANS

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

GOLD

Experimental observation of silver and gold penetration into dental ceramic by means of a radiotracer technique. Moya, F., *et al.* 1717

GRAFT VS. HOST DISEASE

Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

GROWTH INHIBITORS

Mandibular growth retardation in growing rats chronically exposed to hypobaria. Bozzini, C.E., *et al.* 65

HAMSTERS

Regional lymph node metastasis created by partial excision of carcinomas induced in hamster cheek pouch with 9,10-dimethyl-1,2-benzanthracene. Kage, T., *et al.* 1673

HEALTH SERVICES RESEARCH

Guest editorial: setting the record straight. Ginley, T.J. 1698

HEMOLYSIS

Bacteriocin-like inhibitory activity associated with beta-hemolytic strains of *streptococcus salivarius*. Tompkins, G.R., *et al.* 1321

HERPESVIRUS HOMINIS

HSV-1-infected oral epithelial cells are targets for natural killer cells. Lindemann, R.A., *et al.* 770

HISPANIC AMERICANS

Prevalence of total tooth loss, dental caries, and periodontal disease in Mexican-American

adults: results from the southwestern HHANES. Ismail, A.I., *et al.* 1183

HORSERADISH PEROXIDASE

Uptake of horseradish peroxidase in monkey temporomandibular joint synovium after occlusal alteration, The. Kubo, Y. 1049

HOST-PARASITE RELATIONS

Invited review: possible mechanisms involved in the immunoregulation of chronic inflammatory periodontal disease. Seymour, G.J. 2

Ontogeny and senescence of salivary immunity. Smith, D.J., *et al.* 451*

Proteolytic activity of bacteria isolated from the oral cavities of BALB/c mice toward salivary protein. Dumas, C., *et al.* 62

HYALURONIDASE

Hyaluronidase activity of rabbit skin wound granulation tissue fibroblasts. Ruggiero, S.L., *et al.* 1283+

HYDROLYSIS

Substance P and mucus glycoprotein secretion. Fleming, N., *et al.* 588*

HYDROXYAPATITES

Adherence of *treponema denticola* to modified hydroxyapatite. Cimasoni, G., *et al.* 1727

Early microbial colonization of permucosal implants in edentulous patients. Nakou, M., *et al.* 1654

Effect of acid type on kinetics and mechanism of dental enamel demineralization. Patel, M.V., *et al.* 1425

Influence of incorporated and adsorbed fluoride on the dissolution of powdered and pelletized hydroxyapatite in fluoridated and nonfluoridated acid buffers, The. Wong, L., *et al.* 1735

Interference of IgA protease with the effect of secretory IgA on adherence of oral streptococci to saliva-coated hydroxyapatite. Reinholdt, J., *et al.* 492*

Physical model for non-steady-state dissolution of dental enamel. Patel, M.V., *et al.* 1418

IADR/AADR

Divisional abstracts. 805-960

IADR/AADR council proceedings, general and annual sessions. 1205-1292

IATROGENIC DISEASE

Iatrogenic causes of salivary gland dysfunction. Schubert, M.M., *et al.* 680!

IGA

Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

IMMUNE SYSTEM

Invited review: possible mechanisms involved in the immunoregulation of chronic inflammatory periodontal disease. Seymour, G.J. 2

IMMUNOCOMPETENCE

Immunocompetent cells in the normal dental pulp. Jontell, M., *et al.* 1149

IMMUNOGLOBULINS

Antimicrobial factors in saliva: ontogeny and relation to oral health. Tenovuo, J., *et al.* 475*

Interference of IgA protease with the effect of secretory IgA on adherence of oral streptococci to saliva-coated hydroxyapatite. Reinholdt, J., *et al.* 492*

Ontogeny and senescence of salivary immunity. Smith, D.J., *et al.* 451*

INCISOR

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778

Effect of rate of increase of electrical current on the sensation thresholds of teeth, The. Abdel Wahab, M.H., *et al.* 799

Hard tissue barrier formation in pulpotomized monkey teeth capped with cyanoacrylate or calcium hydroxide for 10 and 60 minutes. Cvek, M., *et al.* 1166

Immunocytochemical localization of osteocalcin in developing rat teeth. Gorter De Vries, I., *et al.* 784

Impeded eruption rate of the rat maxillary incisor during exposure to different simulated altitudes. Giglio, M.J., *et al.* 1490

Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702

Movement of fibroblasts in the periodontal ligament of the mouse incisor is related to eruption. Beertsen, W., *et al.* 1006

INFLAMMATION

Morphometric analysis of teeth with inflamed pulp. Warfvinge, J. 78

INOSITOL

Mobilization of intracellular calcium by methacholine and inositol 1,4,5-trisphosphate in rat parotid acinar cells. Aub, D.L., *et al.* 547*

Substance P and mucus glycoprotein secretion. Fleming, N., *et al.* 588*

INSULIN

Parotid gland function in streptozotocin-diabetic rats. Anderson, L.C. 425*

INTERLEUKIN 1

In vitro modulation of T6 expression on gingival langerhans cells by interleukin-1 inhibitors and ETAF. Walsh, L.J., *et al.* 766

IONS

Ion transport and water movement. Martinez, J.R. 638!

ISOPROTERENOL

Effects of various secretagogues on the mucin content of pure submandibular salivas, The. Denny, P.C., *et al.* 1011

Morphological changes of intercellular junctions in the rat submandibular gland treated by long-term repeated administration of isoproterenol. Inoue, T., *et al.* 1303

JAW

Effect of sectioning the trigeminal sensory root on the periodontally-induced jaw-opening reflex, The. Collier, T.G., *et al.* 1533

Timing of temporomandibular joint sounds in orthodontic patients. Muhl, Z.F., *et al.* 1389

KERATIN

In vitro modulation of T6 expression on gingival langerhans cells by interleukin-1 inhibitors and ETAF. Walsh, L.J., *et al.* 766

Identification of merkel cells in oral epithelium using antikeratin and antineuroendocrine monoclonal antibodies. Ness, K.H., *et al.* 1154

KERATOCONJUNCTIVITIS

Overview of sjögren's syndrome. Talal, N. 672!

KILLER-CELLS, NATURAL

HSV-1-infected oral epithelial cells are targets for natural killer cells. Lindemann, R.A., *et al.* 770

KIDNEYS

Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

LACTATES

L-serine enhances the anaerobic lactate metabolism of *veillonella* dispar ATCC 17745. Hoshino, E. 1162

LACTOBACILLUS

Bacteriological study of rampant caries in children, A. Boue, D., *et al.* 23

Lysozyme-protease-inorganic monovalent anion lysis of oral bacterial strains in buffers and stimulated whole saliva. Pollock, J.J., *et al.* 467*

Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

LACTOFERRIN

Characterization of lactoferrin interaction with *streptococcus mutans*. Lassiter, M.O., *et al.* 480*

LACTOPEROXIDASE

Effect of the lactoperoxidase system on streptococcal acid production and growth. Donoghue, H.D., *et al.* 616*

LANGERHANS CELLS

In vitro modulation of T6 expression on gingival langerhans cells by interleukin-1 inhibitors and ETAF. Walsh, L.J., *et al.* 766

LICHEN PLANUS

Sialochemistry of whole, parotid, and labial minor gland saliva in patients with oral lichen planus. Gandara, B.K., *et al.* 1619

LIPASE

Regulation of secretion of enzymes from von Ebner's gland of rat tongue. Field, R.B., *et al.* 586*

LUBRICATION

Artificial salivas: present and future. Levine, M.J., *et al.* 693!
Rheology of saliva, The. Schwarz, W.H. 660!

LUMINESCENCE

Effects of eugenol on polymorphonuclear cell migration and chemiluminescence. Fotos, P.G., *et al.* 774

LYMPH NODES

Regional lymph node metastasis created by partial excision of carcinomas induced in hamster cheek pouch with 9,10-dimethyl-1,2-benzanthracene. Kage, T., *et al.* 1673

LYMPHOCYTES

Immunologic approaches to the therapy of autoimmune salivary gland disease. Lane, H.C., *et al.* 703!

LYMPHOID TISSUE

Minor salivary gland duct-associated lymphoid tissue (DALT) in monkeys changes with age. Nair, P.N.R., *et al.* 407*

MANDIBLE

Changes of serum alkaline phosphatase following mandibular osteotomy in the rat. Nilsson, L.P., *et al.* 1195
Effects of ion transport inhibition on rat mandibular gland secretion. Young, J.A., *et al.* 531*
Long-term epidemiologic study of the relationship between occlusal factors and mandibular dysfunction in children and adolescents, A. Egermark-Eriksson, I., *et al.* 67
Mandibular growth retardation in growing rats chronically exposed to hypobaria. Bozzini, C.E., *et al.* 65

MANDIBULAR CONDYLE

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84
Temporomandibular joint morphology in two Australian aboriginal populations. Richards, L.C. 1602

MASTICATION

Measurement of selection chances and breakage functions during chewing in man. Van der glas, H.W., *et al.* 1547
Periodontal mechanoreceptors and parotid secretion in animals and man. Anderson, D.J., *et al.* 518*

MASTICATORY MUSCLES

Experimental masticatory muscle pain. Bowley, J.F., *et al.* 1765

MATERIALS TESTING

Relationship between test methodology and elastic behavior of composites, The. Braem, B., *et al.* 1036

MAXILLOFACIAL PROSTHESIS

Color accuracy of the kubelka-munk theory for various colorants in maxillofacial prosthetic material. The. Ma, T., *et al.* 1438

MERCURY

Correlation between amalgam restorations and mercury concentrations in urine. Olstad, M.L., *et al.* 1179
Dissolution of mercury from amalgam into saline solution. Okabe, T., *et al.* 33
Factors affecting estimation of dental amalgam mercury exposure from measurements of mercury vapor levels in intra-oral and expired air. Mackert, J.R., Jr. 1775
X-ray diffractometric investigation of the Sn-Hg binary system within the 0-40% Hg interval, An. Söderholm, K.-J.M. 712

METALLOPROTEINS

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

METHACHOLINE COMPOUNDS

Mobilization of intracellular calcium by methacholine and inositol 1,4,5-trisphosphate in rat parotid acinar cells. Aub, D.L., *et al.* 547*

METHACRYLATES

Adhesion of resins to Ag-Pd alloys by means of the silicoating technique. Herø, H., *et al.* 1380
Effect of acidic pretreatment on adhesion to dentin mediated by gluma. Asmussen, E., *et al.* 1386

METHOTREXATE

Methotrexate-induced changes in rat parotid and submandibular gland function. McBride, R.K., *et al.* 1445

METHOXAMINE

Developmental changes in the volumes, protein, and some electrolyte concentrations of male and female rat submandibular saliva secreted in response to methoxamine and pilocarpine. Abe, K., *et al.* 745

MICE

Collagen phagocytosis by fibroblasts in the periodontal ligament of the mouse molar during the initial phase of hypofunction. Beertsen, W. 1708
Effects of fluoride on the mouse sperm morphology test. Li, Y., *et al.* 1509
Effects of various secretagogues on the mucin content of pure submandibular salivas, The. Denny, P.C., *et al.* 1011
Lack of genotoxic effects of fluoride in the mouse bone-marrow micronucleus test. Li, Y., *et al.* 1687
Movement of fibroblasts in the periodontal ligament of the mouse incisor is related to eruption. Beertsen, W., *et al.* 1006

MICROELECTRODES

Micro-electrode techniques for the analysis of oral fluids. Vogel, G.L., *et al.* 1691

MICROSCOPY, ELECTRON

Possible physico-chemical processes in human dentin caries. Daculsi, G., *et al.* 1356
Salivary gland changes in disease. Tandler, B. 398*
Ultrastructure of extracellular polysaccharides produced by serotype *c streptococcus mutans*. Toda, Y., *et al.* 1364
Uptake of horseradish peroxidase in monkey temporomandibular joint synovium after occlusal alteration, The. Kubo, Y. 1049

MICROSCOPY, ELECTRON, SCANNING

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778
Lumen formation during development of the rat submandibular gland. Cutler, L.S., *et al.* 1559
Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000
Ultrastructure of human dental enamel heat-treated in the temperature range 200° C to 600° C, The. Palamara, J., *et al.* 1742
Wear and microhardness of glass-ionomer cements. McKinney, J.E., *et al.* 1134

MILK

Modification of food cariogenicity in rats by mineral-rich concentrates from milk. Harper, D.S., *et al.* 42

MITOSIS

Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399

MODELS, DENTAL

Animal models of sjögren's syndrome. Cutler, L.S., *et al.* 590*
Color accuracy of the kubelka-munk theory for various colorants in maxillofacial prosthetic material. The. Ma, T., *et al.* 1438
Development of an intra-oral single-section remineralization model. Wefel, J.S., *et al.* 1485
Effect of acid type on kinetics and mechanism of dental enamel demineralization. Patel, M.V., *et al.* 1425
Physical model for non-steady-state dissolution of dental enamel. Patel, M.V., *et al.* 1418
Surface area of the adult human mouth and thickness of the salivary film covering the teeth and oral mucosa, The. Collins, L.M.C., *et al.* 1300
Verification of theoretical modeling of heat transmission in teeth by *in vivo* experiments. Spierings, Th. A.M., *et al.* 1336

MOLAR

Calbindin-D_{28K} localization in rat molars during odontogenesis. Elms, T.N., *et al.* 1431

MONKEYS

Hard tissue barrier formation in pulpotomized monkey teeth capped with cyanoacrylate or

calcium hydroxide for 10 and 60 minutes. Cvek, M., *et al.* 1166
Minor salivary gland duct-associated lymphoid tissue (DALT) in monkeys changes with age. Nair, P.N.R., *et al.* 407*
Molecular basis of salivary proline-rich protein and peptide synthesis: cell-free translations and processing of human and macaque statherin mRNAs and partial amino acid sequence of their signal peptides. Oppenheim, F.G., *et al.* 462*
Uptake of horseradish peroxidase in monkey temporomandibular joint synovium after occlusal alteration, The. Kubo, Y. 1049

MOTTLED ENAMEL (*see also* Fluorosis)

Patterns of dental fluorosis in a European country in relation to the fluoride concentration of drinking water. Larsen, M.J., *et al.* 10
Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: a discussion of risks and benefits. Ripa, L.W. 1079#
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

MOUTH

X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

MOUTH MUCOSA

Early microbial colonization of permucosal implants in edentulous patients. Nakou, M., *et al.* 1654
Sialochemistry of whole, parotid, and labial minor gland saliva in patients with oral lichen planus. Gandara, B.K., *et al.* 1619
Surface area of the adult human mouth and thickness of the salivary film covering the teeth and oral mucosa, The. Collins, L.M.C., *et al.* 1300

MOUTHWASHES

Clinical application of topical fluoride products - risks, benefits, and recommendations. Lecompte, E.J. 1066#
Fluoride in saliva and plaque following use of fluoride-containing mouthwashes. Duckworth, R.M., *et al.* 1730
Pharmacokinetic aspects of topical fluorides. Ekstrand, J. 1061#
Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: effects on physiologic and biochemical processes. Whitford, G.M., *et al.* 1072#

MUCINS

Effects of various secretagogues on the mucin content of pure submandibular salivas, The. Denny, P.C., *et al.* 1011
Molecular mechanism of mucin secretion: I. The role of intragranular charge shielding. Verdugo, P., *et al.* 506*
Substance P and mucus glycoprotein secretion. Fleming, N., *et al.* 588*

MUMPS

Inflammatory and obstructive disorders of salivary glands. Blitzer, A. 675!

MURAMIDASE

Lysozyme-protease-inorganic monovalent anion lysis of oral bacterial strains in buffers and stimulated whole saliva. Pollock, J.J., *et al.* 467*

MUSCLES

Effects of tenotomy on the morphology of the rabbit digastric muscle, The. Waryjas, R.J., *et al.* 802

MUTAGENICITY TESTS

Lack of genotoxic effects of fluoride in the mouse bone-marrow micronucleus test. Li, Y., *et al.* 1687

NASAL SEPTUM

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

NEOPLASM METASTASIS

Regional lymph node metastasis created by partial excision of carcinomas induced in hamster cheek pouch with 9,10-dimethyl-1,2-benzanthracene. Kage, T., *et al.* 1673

NEUROPEPTIDES

Neuropeptides and secretion. Ekström, J. 524*

NEUROREGULATORS

Neurotransmitter control of secretion. Baum, B.J. 628!

NICOTINE

Evaluation of biochemical validation measures in determination of smoking status. Stookey, G.K., *et al.* 1597

NIGERICIN

Comparison of the effects of fluoride and the ionophore nigericin on acid production by *streptococcus mutans* and the resultant *in vitro* enamel demineralization. Van Louveren, C., *et al.* 1658

NITROGEN

X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

OCCIPITAL BONE

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

OCCLUSION

Long-term epidemiologic study of the relationship between occlusal factors and mandibular dysfunction in children and adolescents, A. Egermark-Eriksson, I., *et al.* 67

ODONTOBLASTS

Dental papilla cells synthesize but do not deposit fibronectin in culture. Thesleff, I., *et al.* 1107
Immunocytochemical localization of osteocalcin in developing rat teeth. Gorter De Vries, I., *et al.* 784

ODONTOGENESIS

Calbindin-D_{28K} localization in rat molars during odontogenesis. Elms, T.N., *et al.* 1431
Immunocytochemical localization of osteocalcin in developing rat teeth. Gorter De Vries, I., *et al.* 784

OLIGOSACCHARIDES

Genetic and sex-related differences in the structure of submandibular glycoconjugates. Schulte, B.A. 442*

ORAL HEALTH

Antimicrobial factors in saliva: ontogeny and relation to oral health. Tenovuo, J., *et al.* 475*
Impact of dental and facial pain, The. Locker, D., *et al.* 1414

ORAL HYGIENE

30-month longitudinal study of the effects of some oral hygiene measures on *streptococcus mutans* and approximal dental caries, A. Axelsson, P., *et al.* 761
Epidemiological investigation into the relative importance of age and oral hygiene status as determinants of periodontitis, An. Abdellatif, H.M., *et al.* 13

ORNITHINE DECARBOXYLASE

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

ORTHODONTICS

Timing of temporomandibular joint sounds in orthodontic patients. Muhl, Z.F., *et al.* 1389

OSTEOBLASTS

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

OSTEOGENESIS

Human dentin matrix induces cartilage formation *in vitro* by mesenchymal cells derived from embryonic muscle. Somerman, M.J., *et al.* 1551
Short-term uptake and retention of fluoride in developing enamel and bone, The. Bawden, J.W., *et al.* 1587

OSTEOTOMY

Changes of serum alkaline phosphatase following mandibular osteotomy in the rat. Nilsson, L.P., *et al.* 1195

OUABAIN

Effect of cholesterol feeding on membrane fluidity, ($Na^+ + K^+$) ATPase, adenylate cyclase, [^{3}H]-ouabain-, and [^{3}H]-dihydroalprenolol-binding in rat submandibular salivary glands. Alam, S.Q., *et al.* 605*

Is the stoichiometry of the parotid co-transporter 1 Na: 1 K: 2 Cl Hedemark Poulsen, J., *et al.* 608*

OXYGEN

Characterization of lactoferrin interaction with *streptococcus mutans*. Lassiter, M.O., *et al.* 480*

Is the stoichiometry of the parotid co-transporter 1 Na: 1 K: 2 Cl Hedemark Poulsen, J., *et al.* 608*

OXYGEN CONSUMPTION

Oxygen consumption mediated by M_2 muscarinic receptors in rat salivary glands. Stojić, D., *et al.* 1435

PAIN MEASUREMENT

Comparison of pain associated with mechanical and chemomechanical removal of caries. Anusavice, K.J., *et al.* 1680

Experimental masticatory muscle pain. Bowley, J.F., *et al.* 1765

Impact of dental and facial pain, The. Locker, D., *et al.* 1414

PALATE

Longitudinal study of anteroposterior growth changes in the palatine rugae, A. Simmons, J.D., *et al.* 1512

PARASYMPATHETIC NERVOUS SYSTEM

Concerning the origin of substance P-containing nerves in rat parotid glands. Breen, M.F., *et al.* 583*

Impact of dental and facial pain, The. Locker, D., *et al.* 1414

Nerve interactions in salivary glands. Emmelin, N. 509*

Proper role of nerves in salivary secretion: a review, The. Garrett, J.R. 387*

Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation. Mann, G.E., *et al.* 569*

Transcapillary transport during secretion by the rabbit submandibular salivary gland. Smaje, L.H., *et al.* 564*

PARASYMPATHOMIMETICS

Oxygen consumption mediated by M_2 muscarinic receptors in rat salivary glands. Stojić, D., *et al.* 1435

PARATHYROID HORMONES

Effect of parathyroid hormone (1-34) on cyclic AMP level, ornithine decarboxylase activity, and glycosaminoglycan synthesis of chondrocytes from mandibular condylar cartilage, nasal septal cartilage, and sphenooccipital synchondrosis in culture, The. Takano, T., *et al.* 84

PAROTID GLAND (*see* **Salivary Glands**)

PAROTID DISEASES

Salivary gland changes in disease. Tandler, B. 398*

PEDODONTICS

Pharmacological evaluation of an intra-oral fluoride-releasing device in adolescents. Kula, K., *et al.* 1538

PEPTIDE HYDROLASES

Developmental changes of esteroprotease and androgen receptors in the mouse submandibular gland. Baba, R., *et al.* 1623

Lysozyme-protease-inorganic monovalent anion lysis of oral bacterial strains in buffers and stimulated whole saliva. Pollock, J.J., *et al.* 467*

PEPTIDES

Biologically-active, low-molecular-weight peptides in human saliva. Distler, W., *et al.* 603*

Molecular basis of salivary proline-rich protein and peptide synthesis: cell-free translations and processing of human and macaque statherin mRNAs and partial amino acid sequence of their signal peptides. Oppenheim, F.G., *et al.* 462*

PERIODONTAL DISEASE

Bacteriology of human gingivitis. Moore, L.V.H., *et al.* 989

Cost-effective analysis of periodontal disease control. Antczak-Bouckoms, A.A., *et al.* 1630

Cross-reactivity study of whole genomic DNA probes for *haemophilus actinomycetemcomitans, bacteroides intermedius*, and *bacteroides gingivalis*. Strzempko, M.N., *et al.* 1543

Efficiency of half-mouth examinations in estimating the prevalence of periodontal disease, The. Hunt, R.J. 1044

Epidemiological investigation into the relative importance of age and oral hygiene status as determinants of periodontitis, An. Abdellatif, H.M., *et al.* 13

Invited review: possible mechanisms involved in the immunoregulation of chronic inflammatory periodontal disease. Seymour, G.J. 2

Prevalence of total tooth loss, dental caries, and periodontal disease in Mexican-American adults: results from the southwestern HHANES. Ismail, A.I., *et al.* 1183

PERIODONTAL INDEX

Efficiency of half-mouth examinations in estimating the prevalence of periodontal disease, The. Hunt, R.J. 1044

PERIODONTAL LIGAMENT

Collagen phagocytosis by fibroblasts in the periodontal ligament of the mouse molar during the initial phase of hypofunction. Beertsen, W. 1708

Effect of sectioning the trigeminal sensory root on the periodontally-induced jaw-opening reflex, The. Collier, T.G., *et al.* 1533

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399

Movement of fibroblasts in the periodontal ligament of the mouse incisor is related to eruption. Beertsen, W., *et al.* 1006

PERIODONTAL POCKET

Cross-inhibition between black-pigmented *bacteroides* species. Van Winkelhoff, A.J., *et al.* 1663

PERIODONTAL TISSUE

Periodontal mechanoreceptors and parotid secretion in animals and man. Anderson, D.J., *et al.* 518*

PERIODONTITIS

Antigenic heterogeneity of non-pigmented *bacteroides* species isolated from the human oral cavity. Kato, T., *et al.* 996

Bacteriology of human gingivitis. Moore, L.V.H., *et al.* 989

Initial characterization of a neutral metalloproteinase, active on native 3/4-collagen fragments, synthesized by ROS 17/2.8 osteoblastic cells, periodontal fibroblasts, and identified in gingival crevicular fluid. Overall, C.M., *et al.* 1271+

PEROXIDASES

Effects of variations in pH and hypothiocyanite concentrations on *s. mutans* glucose metabolism. Mansson-Rahemtulla, B., *et al.* 486*

PHAGOCYTOSIS

Collagen phagocytosis by fibroblasts in the periodontal ligament of the mouse molar during the initial phase of hypofunction. Beertsen, W. 1708

PHARMACOKINETICS, ORAL

Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*

PHENYTOIN

Phenytoin and 5-(p-hydroxyphenyl)-5-phenylhydantoin do not alter the effects of bacterial and amplified plaque extracts on cultures of fibroblasts from normal and overgrown gingivae. Smith, Q.T., *et al.* 1393

PHOSPHATASES

Changes of serum alkaline phosphatase following mandibular osteotomy in the rat. Nilsson, L.P., *et al.* 1195

PHOSPHOLIPIDS

Calcium-dependent protein kinase reactions associated with parotid gland secretory granule membranes. Dowd, F., *et al.* 557*

PHOSPHORUS

X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

PHOSPHOPROTEINS

Role of protein phosphorylation in rat salivary gland exocytosis. Quissell, D.O., *et al.* 596*

PHOSPHOTRANSFERASES, ATP

Calcium-dependent protein kinase reactions associated with parotid gland secretory granule membranes. Dowd, F., *et al.* 557*

Selection for *streptococcus mutans* with an altered xylitol transport capacity in chronic xylitol consumers. Trahan, L., *et al.* 982

PHOTOMETRY

Evaluation of biangular reflection photometry for quantitative study of etched alloy surface roughness. Kelly, J.R., *et al.* 1350

PIGMENTATIONS

Color accuracy of the kubelka-munk theory for various colorants in maxillofacial prosthetic material. The. Ma, T., *et al.* 1438

PILOCARPINE

Developmental changes in the volumes, protein, and some electrolyte concentrations of male and female rat submandibular saliva secreted in response to methoxamine and pilocarpine. Abe, K., *et al.* 745

Effects of various secretagogues on the mucin content of pure submandibular saliva. The. Denny, P.C., *et al.* 1011

Systemic therapy of salivary gland hypofunction. Fox, P.C. 689!

PIT AND FISSURE SEALANTS

Incorporation into human enamel of fluoride slowly released from a sealant *in vivo*. Tanaka, M., *et al.* 1591

PLASMA

Comparison of the effects of continuous and periodic fluoride delivery on fluoride levels in plasma, enamel, and bones of nursing rats, A. Drinkard, C.R., *et al.* 19

PLASMINOGEN

Characterization of plasminogen activators in unstimulated and stimulated human whole saliva. Sindet-Pedersen, S., *et al.* 1199

POLYMETHACRYLIC ACIDS

Characterization of polydimethacrylates and their composites by dynamic mechanical analysis. Wilson, T.W., *et al.* 1032

Investigation into the fracture behavior of a particulate-filled bis-GMA resin, An. Davis, D.M., *et al.* 1128

POLYSACCHARIDES

Ultrastructure of extracellular polysaccharides produced by serotype *c streptococcus mutans*. Toda, Y., *et al.* 1364

POLYTETRAFLUOROETHYLENE

Hard tissue barrier formation in pulpotomized monkey teeth capped with cyanoacrylate or calcium hydroxide for 10 and 60 minutes. Cvek, M., *et al.* 1166

PORCELAINS

Shear strength of the composite bond to etched porcelain. Stangel, I., *et al.* 1460

POTASSIUM

Cholinergic receptor-regulation of potassium channels and potassium transport in human submandibular acinar cells. Morris, A.P., *et al.* 541*

Is the stoichiometry of the parotid co-transporter 1 Na: 1 K: 2 Cl Hedemark Poulsen, J., *et al.* 608*

POTASSIUM CHLORIDE

Influence of salivary flow rate on diffusion of potassium chloride from artificial plaque at different sites in the mouth, The. LeComte, P., *et al.* 1614

PRESSURE

New method to measure the condensation pressure of amalgam under *in vivo* conditions, A. Lussi, A.S., *et al.* 737

PROTEASES

Interference of IgA protease with the effect of secretory IgA on adherence of oral streptococci to saliva-coated hydroxyapatite. Reinholdt, J., *et al.* 492*

RABBITS

Effects of tenotomy on the morphology of the rabbit digastric muscle, The. Waryjas, R.J., *et al.* 802

Hyaluronidase activity of rabbit skin wound granulation tissue fibroblasts. Ruggiero, S.L., *et al.* 1283+

Periodontal mechanoreceptors and parotid secretion in animals and man. Anderson, D.J., *et al.* 518*

Transcapillary transport during secretion by the rabbit submandibular salivary gland. Smaje, L.H., *et al.* 564*

RADIOGRAPHY, DENTAL

Effects of increased intraluminal pressure on rat submandibular gland morphology, The. Qwarnstrom, E.E., *et al.* 592*

Effects of rare-earth filters on patient exposure and image contrast. Mauriello, S.M., *et al.* 1326

RATS

Abnormal ^{45}Ca fluxes in dispersed submandibular acini of rats treated with reserpine. Müller, R.M., *et al.* 1294

Altered sympathetic-salivary gland development: delayed response to postnatal castration. Melvin, J.E., *et al.* 751

Ameloblast modulation and changes in the Ca, P, and S content of developing enamel matrix as revealed by SEM-EDX. Sasaki, T., *et al.* 778

Animal models of sjögren's syndrome. Cutler, L.S., *et al.* 590*

Autonomic effects on rat submandibular salivary glands. Abe, K. 584*

Calbindin-D_{28K} localization in rat molars during odontogenesis. Elms, T.N., *et al.* 1431

Changes of serum alkaline phosphatase following mandibular osteotomy in the rat. Nilsson, L.P., *et al.* 1195

Comparison of the effects of continuous and periodic fluoride delivery on fluoride levels in plasma, enamel, and bones of nursing rats, A. Drinkard, C.R., *et al.* 19

Concerning the origin of substance P-containing nerves in rat parotid glands. Breen, M.F., *et al.* 583*

Culture of parotid acinar cells on a reconstituted basement membrane substratum. Oliver, C., *et al.* 594*

Developmental changes in the volumes, protein, and some electrolyte concentrations of male and female rat submandibular saliva secreted in response to methoxamine and pilocarpine. Abe, K., *et al.* 745

Diffusion of fluoride through the rat enamel organ *in vitro*. Bawden, J.W., *et al.* 1360

Effect of cholesterol feeding on membrane fluidity, $(Na^+ + K^+)$ ATPase, adenylate cyclase, $[^3H]$-ouabain-, and $[^3H]$-dihydroalprenolol-binding in rat submandibular salivary glands. Alam, S.Q., *et al.* 605*

Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791

Effects of cheese snacks on caries in desalivated rats, The. Krobicka, A., *et al.* 1116

Effects of increased intraluminal pressure on rat submandibular gland morphology, The. Qwarnström, E.E., *et al.* 592*

Effects of ion transport inhibition on rat mandibular gland secretion. Young, J.A., *et al.* 531*

Endocytosis of proteins by salivary gland duct cells. Hand, A.R., *et al.* 412*

Human dentin matrix induces cartilage formation *in vitro* by mesenchymal cells derived from embryonic muscle. Somerman, M.J., *et al.* 1551

Immunocytochemical evidence for the coexistence of catecholestrogen and catechol-O-methyltransferase in the rat parotid gland. Inoue, K., *et al.* 1627

Immunocytochemical localization of osteocalcin in developing rat teeth. Gorter De Vries, I., *et al.* 784

Impeded eruption rate of the rat maxillary incisor during exposure to different simulated altitudes. Giglio, M.J., *et al.* 1490

Influence of vanadate on calcium uptake in maturing enamel of the rat incisor, The. Takano, Y., *et al.* 1702

Intracellular elemental concentrations in resting and secreting rat parotid glands. Izutsu, K.T., *et al.* 537*

Lumen formation during development of the rat submandibular gland. Cutler, L.S., *et al.* 1559

Mandibular growth retardation in growing rats chronically exposed to hypobaria. Bozzini, C.E., *et al.* 65

Methotrexate-induced changes in rat parotid and submandibular gland function. McBride, R.K., *et al.* 1445
Mobilization of intracellular calcium by methacholine and inositol 1,4,5-trisphosphate in rat parotid acinar cells. Aub, D.L., *et al.* 547*
Modification of food cariogenicity in rats by mineral-rich concentrates from milk. Harper, D.S., *et al.* 42
Morphological changes of intercellular junctions in the rat submandibular gland treated by long-term repeated administration of isoproterenol. Inoue, T., *et al.* 1303
Neuropeptides and secretion. Ekström, J. 524*
Non-antibacterial chemically-modified tetracycline inhibits mammalian collagenase activity, A. Golub, L.M., *et al.* 1310
Oxygen consumption mediated by M_2 muscarinic receptors in rat salivary glands. Stojić, D., *et al.* 1435
Parotid gland function in streptozotocin-diabetic rats. Anderson, L.C. 425*
Regulation of parotid salivary proteins by glucocorticoids. Johnson, D.A., *et al.* 1563
Regulation of salivary proteins. Johnson, D.A., *et al.* 576*
Regulation of secretion of enzymes from von Ebner's gland of rat tongue. Field, R.B., *et al.* 586*
Regulatory aspects of N-linked glycoproteins. Kousvelari, E.E., *et al.* 552*
Resorption of residual ridges (RRR) in rats. Nishimura, I., *et al.* 1753
Role of protein phosphorylation in rat salivary gland exocytosis. Quissell, D.O., *et al.* 596*
Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583
Short-term uptake and retention of fluoride in developing enamel and bone, The. Bawden, J.W., *et al.* 1587

RECEPTORS, ANDROGEN

Developmental changes of esteroprotease and androgen receptors in the mouse submandibular gland. Baba, R., *et al.* 1623

RECEPTORS, MUSCARINIC

Oxygen consumption mediated by M_2 muscarinic receptors in rat salivary glands. Stojic', D., *et al.* 1435

REGRESSION ANALYSIS

Epidemiological investigation into the relative importance of age and oral hygiene status as determinants of periodontitis, An. Abdellatif, H.M., *et al.* 13

RESERPINE

Abnormal ^{45}Ca fluxes in dispersed submandibular acini of rats treated with reserpine. Müller, R.M., *et al.* 1294

RETINA

Potential retinal hazards of visible-light photopolymerization units. Satrom, K.D., *et al.* 731

RHEOLOGY

Rheology of saliva, The. Schwarz, W.H. 660!

SACCHARIN

Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791

SALINE SOLUTION

Time-dependent dissolution of amalgams into saline solution. Ferracane, J.L., *et al.* 1331

SALIVA

Antimicrobial factors in saliva: ontogeny and relation to oral health. Tenovuo, J., *et al.* 475*
Biologically-active, low-molecular-weight peptides in human saliva. Distler, W., *et al.* 603*
Characterization of plasminogen activators in unstimulated and stimulated human whole saliva. Sindet-Pedersen, S., *et al.* 1199
Current diagnostic uses of saliva. Ferguson, D.B., *et al.* 420*
Developmental changes in the volumes, protein, and some electrolyte concentrations of male and female rat submandibular saliva secreted in response to methoxamine and pilocarpine. Abe, K., *et al.* 745
Effect of taste adaptation on salivary flow rate and salivary sugar clearance, The. Dawes, C., *et al.* 740
Effects of ion transport inhibition on rat mandibular gland secretion. Young, J.A., *et al.* 531*
Effects of variations in pH and hypothiocyanite concentrations on *s. mutans* glucose metabolism. Mansson-Rahemtulla, B., *et al.* 486*
Effects of various secretagogues on the mucin content of pure submandibular salivas, The. Denny, P.C., *et al.* 1011
Fluoride in saliva and plaque following use of fluoride-containing mouthwashes. Duckworth, R.M., *et al.* 1730
Functions of saliva, The. Mandel, I.D. 623!
Growth of oral bacteria on saliva, The. De Jong, M.H., *et al.* 498*
Iatrogenic causes of salivary gland dysfunction. Schubert, M.M., *et al.* 680!
Influence of human whole saliva on bacterial aggregation. Koop, H.M., *et al.* 613*
Influence of salivary flow rate on diffusion of potassium chloride from artificial plaque at different sites in the mouth, The. LeComte, P., *et al.* 1614
Interference of IgA protease with the effect of secretory IgA on adherence of oral streptococci to saliva-coated hydroxyapatite. Reinholdt, J., *et al.* 492*
Ion transport and water movement. Martinez, J.R. 638!
Is the stoichiometry of the parotid co-transporter 1 Na: 1 K: 2 Cl Hedemark Poulsen, J., *et al.* 608*
Longitudinal age-related changes in human parotid saliva composition. Chauncey, H.H., *et al.* 599*
Lysozyme-protease-inorganic monovalent anion lysis of oral bacterial strains in buffers and stimulated whole saliva. Pollock, J.J., *et al.* 467*
Neuropeptides and secretion. Ekström, J. 524*
Ontogeny and senescence of salivary immunity. Smith, D.J., *et al.* 451*
Periodontal mechanoreceptors and parotid secretion in animals and man. Anderson, D.J., *et al.* 518*
Physiological factors affecting salivary flow rate, oral sugar clearance, and the sensation of dry mouth in man. Dawes, C. 648!
Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*
Proper role of nerves in salivary secretion: a review, The. Garrett, J.R. 387*
Proteolytic activity of bacteria isolated from the oral cavities of BALB/c mice toward salivary protein. Dumas, C., *et al.* 62
Purification and some properties of fucosyltransferase in human parotid saliva. Tamagawa, H., *et al.* 72
Regulation of salivary proteins. Johnson, D.A., *et al.* 576*
Relationship between dental plaque indices and bacteria in dental plaque and those in saliva. Schaeken, M.J.M., *et al.* 1499
Rheology of saliva, The. Schwarz, W.H. 660!
Sialochemistry of whole, parotid, and labial minor gland saliva in patients with oral lichen planus. Gandara, B.K., *et al.* 1619
Simplified diagnostic system for cultural detection and enumeration of *streptococcus mutans*, A. Jordan, H.V., *et al.* 57
Structural and genetic aspects of proline-rich proteins. Bennick, A. 457*
Structural aspects of salivary glycoproteins. Levine, M.J., *et al.* 436*
Substrate specificity of fucosyltransferase purified from human parotid saliva. Tamagawa, H., *et al.* 756
Surface area of the adult human mouth and thickness of the salivary film covering the teeth and oral mucosa, The. Collins, L.M.C., *et al.* 1300
X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

SALIVA, ARTIFICIAL

Artificial salivas: present and future. Levine, M.J., *et al.* 693!

SALIVARY GLAND NEOPLASMS

Salivary gland changes in disease. Tandler, B. 398*

SALIVARY GLANDS

Altered sympathetic-salivary gland development: delayed response to postnatal castration. Melvin, J.E., *et al.* 751
Animal models of sjögren's syndrome. Cutler, L.S., *et al.* 590*
Antimicrobial factors in saliva: ontogeny and relation to oral health. Tenovuo, J., *et al.* 475*

Morphological changes of intercellular junctions in the rat submandibular gland treated by long-term repeated administration of isoproterenol. Inoue, T., *et al.* 1303
Regulation of amino acid influx and efflux at the basolateral plasma membrane of the salivary gland epithelium: effects of parasympathetic nerve stimulation. Mann, G.E., *et al.* 569*
Structural and genetic aspects of proline-rich proteins. Bennick, A. 457*
Substance P and mucus glycoprotein secretion. Fleming, N., *et al.* 588*
Transcapillary transport during secretion by the rabbit submandibular salivary gland. Smaje, L.H., *et al.* 564*

SALIVARY PROTEINS

Altered sympathetic-salivary gland development: delayed response to postnatal castration. Melvin, J.E., *et al.* 751
Autonomic effects on rat submandibular salivary glands. Abe, K. 584*
Biologically-active, low-molecular-weight peptides in human saliva. Distler, W., *et al.* 603*
Calcium-dependent protein kinase reactions associated with parotid gland secretory granule membranes. Dowd, F., *et al.* 557*
Developmental changes in the volumes, protein, and some electrolyte concentrations of male and female rat submandibular saliva secreted in response to methoxamine and pilocarpine. Abe, K., *et al.* 745
Effect of β_2-adrenoceptor agonists on saliva proteins and dental caries in asthmatic children. Ryberg, M., *et al.* 1404
Effects of various secretagogues on the mucin content of pure submandibular salivas, The. Denny, P.C., *et al.* 1011
Endocytosis of proteins by salivary gland duct cells. Hand, A.R., *et al.* 412*
Molecular basis of salivary proline-rich protein and peptide synthesis: cell-free translations and processing of human and macaque statherin mRNAs and partial amino acid sequence of their signal peptides. Oppenheim, F.G., *et al.* 462*
Protein production and secretion in exocrine cells. Castle, J.D., *et al.* 633!
Proteolytic activity of bacteria isolated from the oral cavities of BALB/c mice toward salivary protein. Dumas, C., *et al.* 62
Regulation of parotid salivary proteins by glucocorticoids. Johnson, D.A., *et al.* 1563
Regulation of salivary proteins. Johnson, D.A., *et al.* 576*
Structural and genetic aspects of proline-rich proteins. Bennick, A. 457*
Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

SALIVATION

Transcapillary transport during secretion by the rabbit submandibular salivary gland. Smaje, L.H., *et al.* 564*

SCHOOLS, DENTAL

Guest editorial: clinician-scientists needed. Bawden, J.W. 1612

SENSATION

Effect of rate of increase of electrical current on the sensation thresholds of teeth, The. Abdel Wahab, M.H., *et al.* 799

SENSE ORGANS

Invited review: neurobiology of facial and dental pain: present knowledge, future directions, The. Sessle, B.J. 962

SERINE

L-serine enhances the anaerobic lactate metabolism of *veillonella dispar* ATCC 17745. Hoshino, E. 1162

SIALADENITIS

Inflammatory and obstructive disorders of salivary glands. Blitzer, A. 675!

SIALOGRAPHY

Effects of increased intraluminal pressure on rat submandibular gland morphology, The. Qwarnström, E.E., *et al.* 592*

SIALOMETAPLASIA, NECROTIZING

Inflammatory and obstructive disorders of salivary glands. Blitzer, A. 675!

SILANES

Shear strength of the composite bond to etched porcelain. Stangel, I., *et al.* 1460

SILVER

Experimental observation of silver and gold penetration into dental ceramic by means of a radiotracer technique. Moya, F., *et al.* 1717

SJOGREN'S SYNDROME

Animal models of sjögren's syndrome. Cutler, L.S., *et al.* 590*

Overview of sjögren's syndrome. Talal, N. 672!

Use of human minor salivary glands in basic and applied secretion research. Izutsu, K.T., *et al.* 654!

SMOKING

Evaluation of biochemical validation measures in determination of smoking status. Stookey, G.K., *et al.* 1597

SODIUM

Is the stoichiometry of the parotid co-transporter 1 Na: 1 K: 2 Cl Hedemark Poulsen, J., *et al.* 608*

SODIUM CHLORIDE

Dissolution of mercury from amalgam into saline solution. Okabe, T., *et al.* 33

Minor salivary gland duct-associated lymphoid tissue (DALT) in monkeys changes with age. Nair, P.N.R., *et al.* 407*

SPECIAL ISSUES

Proceedings, conference on evaluation and management of salivary gland dysfunction. 622-708

SPECTRUM ANALYSIS

Comparison of four modes of evaluating depth of cure of light-activated composites, A. DeWald, J.P., *et al.* 727

Potential retinal hazards of visible-light photopolymerization units. Satrom, K.D., *et al.* 731

Surface characterization of amalgams using x-ray photoelectron spectroscopy. Hanawa, T., *et al.* 1470

X-ray photoelectron spectroscopic studies of the adsorption of salivary constituents on enamel. Kuboki, Y., *et al.* 1016

SPECTROPHOTOMETRY

Influence of human whole saliva on bacterial aggregation. Koop, H.M., *et al.* 613*

SPECTROPHOTOMETRY, INFRARED

Comparison of four modes of evaluating depth of cure of light-activated composites, A. DeWald, J.P., *et al.* 727

SPERM HEAD

Effects of fluoride on the mouse sperm morphology test. Li, Y., *et al.* 1509

SPIROCHAETALES

Adherence of *treponema denticola* to modified hydroxyapatite. Cimasoni, G., *et al.* 1727

Characteristics of trypsin-like activity in subgingival plaque samples. Bretz, W.A., *et al.* 1668

STAINS AND STAINING

Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029

STARCH

In vitro caries-like lesion production by *streptococcus mutans* and *actinomyces viscosus* using sucrose and starch. Clarkson, B.H., *et al.* 795

STREPTOCOCCUS

Effect of the lactoperoxidase system on streptococcal acid production and growth. Donoghue, H.D., *et al.* 616*

Effects of bicarbonate-based dental powder, fluoride, and saccharin on dental caries and on *streptococcus sobrinus* recoveries in rats. Tanzer, J.M., *et al.* 791

Influence of human whole saliva on bacterial aggregation. Koop, H.M., *et al.* 613*

Interference of IgA protease with the effect of secretory IgA on adherence of oral streptococci to saliva-coated hydroxyapatite. Reinheldt, J., *et al.* 492*

FAECALIS

Effect of histological decalcifying agents on number and stainability of gram-positive bacteria. Wijnbergen, M., *et al.* 1029

MUTANS

In vitro caries-like lesion production by *streptococcus mutans* and *actinomyces viscosus* using sucrose and starch. Clarkson, B.H., *et al.* 795

30-month longitudinal study of the effects of some oral hygiene measures on *streptococcus mutans* and approximal dental caries, A. Axelsson, P., *et al.* 761

Characterization of lactoferrin interaction with *streptococcus mutans*. Lassiter, M.O., *et al.* 480*

Colonization of the human oral cavity by a *streptococcus mutans* mutant producing increased bacteriocin. Hillman, J.D., *et al.* 1092

Comparison of the effects of fluoride and the ionophore nigericin on acid production by *streptococcus mutans* and the resultant *in vitro* enamel demineralization. Van Louveren, C., *et al.* 1658

Effects of pH on expression of sodium fluoride resistance in *streptococcus mutans*. Brussock, S.M., *et al.* 1594

Effects of variations in pH and hypothiocyanite concentrations on *s. mutans* glucose metabolism. Manssen-Rahemtulla, B., *et al.* 486*

Membrane-associated and solubilized ATPases of *streptococcus mutans* and *streptococcus sanguis*. Sutton, S.V.W., *et al.* 1095

Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

Recolonization of human tooth surfaces by *streptococcus mutans* after suppression by chlorhexidine treatment. Emilson, C.G., *et al.* 1503

Root surface caries subsequent to gingivectomy in rats inoculated with *streptococcus sobrinus (mutans)* and *actinomyces viscosus*. Firestone, A.R., *et al.* 1583

Selection for *streptococcus mutans* with an altered xylitol transport capacity in chronic xylitol consumers. Trahan, L., *et al.* 982

Simplified diagnostic system for cultural detection and enumeration of *streptococcus mutans*, A. Jordan, H.V., *et al.* 57

Ultrastructure of extracellular polysaccharides produced by serotype *c streptococcus mutans*. Toda, Y., *et al.* 1364

SALIVARIUS

Bacteriocin-like inhibitory activity associated with beta-hemolytic strains of *streptococcus salivarius*. Tompkins, G.R., *et al.* 1321

SANGUIS

Growth of oral bacteria on saliva, The. De Jong, M.H., *et al.* 498*

Membrane-associated and solubilized ATPases of *streptococcus mutans* and *streptococcus sanguis*. Sutton, S.V.W., *et al.* 1095

STREPTOZOTOCIN

Parotid gland function in streptozotocin-diabetic rats. Anderson, L.C. 425*

STRONTIUM

Concomitant deposition of strontium and fluoride in dental plaque, The. Pearce, E.I.F., *et al.* 1518

SUBMANDIBULAR GLAND (*see* Salivary Glands)

SUBSTANCE P

Bacteriological study of rampant caries in children, A. Boue, D., *et al.* 23

Concerning the origin of substance P-containing nerves in rat parotid glands. Breen, M.F., *et al.* 583*

Substance P and mucus glycoprotein secretion. Fleming, N., *et al.* 588*

SUCROSE

Clinical results after 12 months from a study of the incidence and progression of dental car-

ies in relation to consumption of chewing-gum containing xylitol in school preventive programs. Kandelman, D., *et al.* 1407
Effect of taste adaptation on salivary flow rate and salivary sugar clearance, The. Dawes, C., *et al.* 740
Effects of cheese extract and its fractions on enamel demineralization *in vitro* and *in vivo* in humans. de A. Silva, M.F., *et al.* 1527
In vitro caries-like lesion production by *streptococcus mutans* and *actinomyces viscosus* using sucrose and starch. Clarkson, B.H., *et al.* 795
Physiological factors affecting salivary flow rate, oral sugar clearance, and the sensation of dry mouth in man. Dawes, C. 648!
Physiological factors influencing salivary clearance of sugar and fluoride. Lagerlöf, F., *et al.* 430*

SYMPATHETIC NERVOUS SYSTEM

Nerve interactions in salivary glands. Emmelin, N. 509*
Proper role of nerves in salivary secretion: a review, The. Garrett, J.R. 387*

SYNOVIAL FLUID

Uptake of horseradish peroxidase in monkey temporomandibular joint synovium after occlusal alteration, The. Kubo, Y. 1049

TASTE

Effect of taste adaptation on salivary flow rate and salivary sugar clearance, The. Dawes, C., *et al.* 740

TEMPERATURE

Thermal diffusivity of glass-ionomer cements. Tay, W.M., *et al.* 1040
Ultrastructure of human dental enamel heat-treated in the temperature range 200° C to 600° C, The. Palamara, J., *et al.* 1742
Verification of theoretical modeling of heat transmission in teeth by *in vivo* experiments. Spierings, Th. A.M., *et al.* 1336

TEMPOROMANDIBULAR JOINT

Spectral properties of temporomandibular joint sounds, The. Gay, T., *et al.* 1189
Temporomandibular joint morphology in two Australian aboriginal populations. Richards, L.C. 1602
Timing of temporomandibular joint sounds in orthodontic patients. Muhl, Z.F., *et al.* 1389
Uptake of horseradish peroxidase in monkey temporomandibular joint synovium after occlusal alteration, The. Kubo, Y. 1049

TEMPOROMANDIBULAR JOINT DISEASES

Experimental masticatory muscle pain. Bowley, J.F., *et al.* 1765

TENDONS

Effects of tenotomy on the morphology of the rabbit digastric muscle, The. Waryjas, R.J., *et al.* 802

TETRACYCLINES

Non-antibacterial chemically-modified tetracycline inhibits mammalian collagenase activity, A. Golub, L.M., *et al.* 1310

THERMAL CONDUCTIVITY

Thermal diffusivity of composite restorative materials. Watts, D.C., *et al.* 1576
Thermal diffusivity of glass-ionomer cements. Tay, W.M., *et al.* 1040
Verification of theoretical modeling of heat transmission in teeth by *in vivo* experiments. Spierings, Th. A.M., *et al.* 1336

THERMAL EXPANSION COMPATIBILITY

Effect of incompatibility stress on the fit of metal-ceramic crowns. Anusavice, K.J., *et al.* 1341
Use of a bimaterial strip to predict expansion compatibility. Scherer, G.W. 1340

THIOCYANATE

Evaluation of biochemical validation measures in determination of smoking status. Stookey, G.K., *et al.* 1597

THYROXINE

Regulation of salivary proteins. Johnson, D.A., *et al.* 576*

TISSUE METABOLISM

Phenytoin and 5-(p-hydroxyphenyl)-5-phenylhydantoin do not alter the effects of bacterial and amplified plaque extracts on cultures of fibroblasts from normal and overgrown gingivae. Smith, Q.T., *et al.* 1393

TONGUE

Regulation of secretion of enzymes from von Ebner's gland of rat tongue. Field, R.B., *et al.* 586*

TIN

X-ray diffractometric investigation of the Sn-Hg binary system within the 0-40% Hg interval, An. Söderholm, K.-J.M. 712

TOOTH

Verification of theoretical modeling of heat transmission in teeth by *in vivo* experiments. Spierings, Th. A.M., *et al.* 1336

DEMINERALIZATION

Intracrystalline structure of enamel crystals affected by caries. Tohda, H., *et al.* 1647

ERUPTION

Impeded eruption rate of the rat maxillary incisor during exposure to different simulated altitudes. Giglio, M.J., *et al.* 1490
Movement of fibroblasts in the periodontal ligament of the mouse incisor is related to eruption. Beertsen, W., *et al.* 1006

MIGRATION

Longitudinal study of anteroposterior growth changes in the palatine rugae, A. Simmons, J.D., *et al.* 1512

REMINERALIZATION

Demineralization of human dental roots in the presence of fluoride, The. Hoppenbrouwers, P.M.M., *et al.* 1370
Development of an intra-oral single-section remineralization model. Wefel, J.S., *et al.* 1485
Effect of baseline lesion mineral loss on *in situ* remineralization, The. Strang, R., *et al.* 1644
Intra-oral effects on acid-softened enamel of NaF lozenges administered in divided daily doses. Corpron, R.E., *et al.* 1020
Use of saturated DCPD in remineralization of artificial caries lesions *in vitro*, The. Wefel, J.S., *et al.* 1640

ROOT

Demineralization of human dental roots in the presence of fluoride, The. Hoppenbrouwers, P.M.M., *et al.* 1370
In vitro infection and disinfection of dentinal tubules. Haapasalo, M., *et al.* 1375
Migration, attachment, and orientation of human gingival fibroblasts to root slices, naked and porous-surfaced titanium alloy discs, and zircalloy 2 discs *in vitro*. Lowenberg, B.F., *et al.* 1000
Mitogenic activity of cementum components to gingival fibroblasts. Miki, Y., *et al.* 1399
Relationship between root caries and coronal decay. Vehkalahti, M.M. 1608

TOOTHPASTE

Clinical application of topical fluoride products - risks, benefits, and recommendations. Lecompte, E.J. 1066#
Effects of pH on expression of sodium fluoride resistance in *streptococcus mutans*. Brussock, S.M., *et al.* 1594
Fluoride in dental products: safety considerations. Whitford, G.M. 1056#
Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#
Topical fluorides: a discussion of risks and benefits. Ripa, L.W. 1079#

TOXICOLOGY

Topical fluoride therapy: discussion of some aspects of toxicology, safety, and efficacy. Newbrun, E. 1084#

TREPONEMA

Adherence of *treponema denticola* to modified hydroxyapatite. Cimasoni, G., *et al.* 1727

TRIGEMINAL NERVE

Effect of sectioning the trigeminal sensory root on the periodontally-induced jaw-opening reflex, The. Collier, T.G., *et al.* 1533

TRYPSIN

Characteristics of trypsin-like activity in subgingival plaque samples. Bretz, W.A., *et al.* 1668

URINE

Correlation between amalgam restorations and mercury concentrations in urine. Olstad, M.L., *et al.* 1179

VEILLONELLA

Bacteriological study of rampant caries in children, A. Boue, D., *et al.* 23
L-serine enhances the anaerobic lactate metab-

olism of *veillonella dispar* ATCC 17745. Hoshino, E. 1162
Mixed-culture chemostat system to predict the effect of anti-microbial agents on the oral flora: preliminary studies using chlorhexidine, A. McDermid, A.S., *et al.* 1315

VIRUS DISEASES

Inflammatory and obstructive disorders of salivary glands. Blitzer, A. 675!

VISCOSITY

Artificial salivas: present and future. Levine, M.J., *et al.* 693!
Rheology of saliva, The. Schwarz, W.H. 660!

VITAMIN D-BINDING PROTEIN

Calbindin-D_{28K} localization in rat molars during odontogenesis. Elms, T.N., *et al.* 1431

WATER MOVEMENTS

Ion transport and water movement. Martinez, J.R. 638!

WOUND HEALING

Hyaluronidase activity of rabbit skin wound granulation tissue fibroblasts. Ruggiero, S.L., *et al.* 1283+

XEROSTOMIA

Management of oral sequelae. Wright, W.E. 699!
Overview of sjögren's syndrome. Talal, N. 672!
Physiological factors affecting salivary flow rate, oral sugar clearance, and the sensation of dry mouth in man. Dawes, C. 648!
Systemic therapy of salivary gland hypofunction. Fox, P.C. 689!

X-RAY DIFFRACTION

X-ray diffractometric investigation of the Sn-Hg binary system within the 0-40% Hg interval, An. Söderholm, K.-J.M. 712

X-RAY INTENSIFYING SCREENS

Effects of rare-earth filters on patient exposure and image contrast. Mauriello, S.M., *et al.* 1326

XYLITOL

Clinical results after 12 months from a study of the incidence and progression of dental caries in relation to consumption of chewing-gum containing xylitol in school preventive programs. Kandelman, D., *et al.* 1407
Selection for *streptococcus mutans* with an altered xylitol transport capacity in chronic xylitol consumers. Trahan, L., *et al.* 982
